ServiceNow® - CAD Practice Questions - SecExams.com

SecExams - Focus Only on What's Needed to Pass! - [secexams.com]

Question #1

Which of the following statements is true for the Form Designer? a) To add a field to the form layout, drag the field from the Fields tab to the desired destination on the form. b) To create a new field on a form's table, drag the appropriate data type from the Field Types tab to the form and then configure the new field. c) To remove a field from the form layout, hover over the field to enable the Action buttons, and select the Delete (X) button. d) To add a section to the form layout, drag it from the Field Types tab to the desired destination on the form.

A) a, b, c, and d

B) b, c, and d

C) a, b, and d

D) a, b, and c (Correct Answer)

Explanation

Correct Answer:

D

Community Discussion

Selected Answer: D

correct

Selected Answer: D

correct answer

Selected Answer: D

correct

Selected Answer: D

https://docs.servicenow.com/bundle/vancouver-platform-administration/page/administer/form-administration/concept/c_FormDesign.html

Please help me. Is this questions is enough to clear exam.

Question #2

Which of the following are configured in an Email Notification? a) Who will receive the notification. b) What content will be in the notification. c) When to send the notification. d) How to send the notification.

A) a, b and c (Correct Answer)

B) a, b, and d

C) b, c and d

D) a, c and d

Explanation

Correct Answer:

A

Reference:

https://hi.service-now.com/kb_view.do?sysparm_article=KB0712569

Community Discussion

Selected Answer: A

https://docs.servicenow.com/bundle/tokyo-servicenow-platform/page/administer/notification/task/t_CreateANotification.html

Selected Answer: A

Who, What, When

I think all a, b, c and d are valid. "d" is valid answer as we define how we send the notification: by "how" I mean it's content type, to include or not a push notification as well as SMS and to choose to make it a part of digest.

Selected Answer: A

https://docs.servicenow.com/bundle/vancouver-platform-administration/page/administer/notification/task/t_CreateANotification.html

Correct

Question #3

To see what scripts, reports, and other application artifacts will be in a published application:

A) Enter the name of the Application in the Global search field

B) Open the list of Update Sets for the instance

C) Examine the Application Files Related List in the application to be published (Correct)

Answer)

D) Open the artifact records individually to verify the value in the Application field

Explanation

Correct Answer: C ?

Community Discussion**Selected Answer: C**

this is correct

Selected Answer: C

"Application developers can view the complete list of application files from the custom application record." Source: https://docs.servicenow.com/bundle/vancouver-application-development/page/build/applications/concept/c_ApplicationFiles.html

Selected Answer: C

<https://www.servicenow.com/community/it-service-management-forum/to-see-what-scripts-reports-and-other-application-artifacts-will/m-p/459376>

Copied from the provided link, "Update sets work in scoped apps just like they do in global scope. But there is a better way to move scoped apps from one instance to another. This capability is called "publish" and it allows you to move an application just like you would with a single executable. The publish capability checks for dependencies and locks the application in the instance where it has been moved so that no changes can be made". for option B

Question #4

Which one of the following is NOT a debugging strategy for client-side scripts?

A) `g_form.addInfoMessage()`

B) Field Watcher

C) `jslog()`

D) `gs.log()` (Correct Answer)

Explanation

Correct Answer:

D

Reference:

https://developer.servicenow.com/dev.do#!/learn/learning-plans/istanbul/new_to_servicenow/app_store_learnv2_scripting_istanbul_debugging_client_scripts

Community Discussion

correct

Selected Answer: D

gs.log() statement are for server-side only. <https://www.servicenow.com/community/new-platform-forum/gs-log-doesnt-work-on-client-script/m-p/1187478>

Selected Answer: D

D is correct

Selected Answer: D

Glide System object is not allowed in client-side

Selected Answer: D

You can test this!

Question #5

Which Application Access configuration field(s) are NOT available if the Can read configuration field is NOT selected?

- A) All access to this table via web services
- B) Can create, Can update, and Can delete (Correct Answer)**
- C) Can read does not affect the availability of other Application Access fields
- D) Allow configuration

Explanation

Correct Answer:

B

Community Discussion

Answer is "B"

Selected Answer: B

"You must first select read access to grant any other API record operation." https://docs.servicenow.com/bundle/tokyo-application-development/page/build/applications/reference/r_TableApplicationAccessFields.html

Selected Answer: B

I've just tried it and certainly answer is B

B is correct. https://docs.servicenow.com/en-US/bundle/utah-application-development/page/build/applications/concept/c_ExampleGrantingAllRuntimeAccess.html

Selected Answer: B

B is correct

Question #6

Which of the following is NOT a trigger type in Flow Designer?

A) Outbound Email (Correct Answer)

B) Application

C) Record

D) Schedule

Explanation

Correct Answer:

A

Reference:

<https://docs.servicenow.com/bundle/orlando-servicenow-platform/page/administer/flow-designer/reference/flow-triggers.html>

Community Discussion

Selected Answer: A

Outbound email is not a trigger type

Selected Answer: A

See list of triggers on right hand side of this webpage: <https://docs.servicenow.com/en-US/bundle/tokyo-application-development/page/administer/flow-designer/reference/flow-triggers.html>

Source: <https://docs.servicenow.com/bundle/vancouver-build-workflows/page/administer/flow-designer/reference/flow-triggers.html>

Should be A and D. Flow designer trigger types are Application, Record, Date.. So in this case we kinda considering D schedule as Date, which is weird..

Schedule is the wrong answer. Answers must be messed up. Outbound email is a wrong answer too.

Question #7

When creating new application files in a scoped application, cross scope access is turned on by default in which of the following?

A) REST messages

B) Table (Correct Answer)

C) Script Include

D) Workflow

Explanation

Correct Answer:

B

Reference:

<https://docs.servicenow.com/bundle/orlando-application-development/page/build/applications/task/set-RCA-level.html>

Community Discussion

B and D

Selected Answer: B

"By default, all application scope scripts can read the table's records but cannot perform any other database operations." https://developer.servicenow.com/dev.do#!/learn/learning-plans/tokyo/servicenow_administrator/app_store_learnv2_securingapps_tokyo_application_access_database_settings

B is correct answer

Selected Answer: B

Cross-scope privileges can be granted for: Table: Read, write, create, delete records Script Include: Execute API Scriptable (script objects): Execute API Reference: <https://www.servicenow.com/community/developer-blog/securing-an-application-using-cross-scope-access-application/ba-p/2288801#:~:text=Cross%20scope%20access%20allows%20administrators,run%20on%20the%20target%20ins>

Selected Answer: D

Both B & D are correct

Question #8

In an Email Notification, which one of the following is NOT true for the Weight field?

- A) Only Notifications with the highest weight for the same record and recipients are sent
- B) A Weight value of zero means that no email should be sent (Correct Answer)**
- C) The Weight value defaults to zero
- D) A Weight value of zero means the Notification is always sent when the Notification's When to send criteria is met

Explanation

Correct Answer:

B

Reference:

https://docs.servicenow.com/bundle/orlando-servicenow-platform/page/administer/notification/task/t_CreateANotification.html

Community Discussion

Selected Answer: B

Which is "NOT" true. A, C, D are true. B is false.

Selected Answer: D

D is the right one https://docs.servicenow.com/bundle/vancouver-platform-administration/page/administer/notification/task/t_CreateANotification.html

https://docs.servicenow.com/bundle/tokyo-servicenow-platform/page/administer/notification/task/t_CreateANotification.html The correct answer is D " The default value 0 causes the system to always send the notification (assuming the conditions are met)."

Selected Answer: B

B moi dung nha may ba oi

B is the right answer. See the "NOT" in the question.

Question #9

Which of the following objects does a Display Business Rule NOT have access to?

A) previous (Correct Answer)

- B) GlideSystem
- C) g_scratchpad
- D) current

Explanation

Correct Answer:

A

Reference:

https://community.servicenow.com/community?id=community_question&sys_id=8af90f29db5cdb5c01dcaf3231f96197c

Community Discussion

Question should be asking about async business rules

But the problem is, that g_scratchpad is also not available in Async BR...

Selected Answer: A

Business Rules often use the current and previous objects in their script logic. The current object is automatically instantiated from the GlideRecord class. The current object's properties are all the fields for a record and all the GlideRecord methods. The property values are the values as they exist in the runtime environment. The previous object is also automatically instantiated from the GlideRecord class. The previous object's properties are also all fields from a record and the GlideRecord methods. The property values are the values for the record fields when they were loaded from the database and before any changes were made. The previous object is not available for use in async Business Rules.

Selected Answer: A

Yes, I think this should be about async business rules: https://docs.servicenow.com/bundle/tokyo-application-development/page/script/business-rules/concept/c_BusinessRules.html

Previous is only unavailable in Async Business Rules

Question #10

Which of the following features are available to Global applications? (Choose two.)

A) Automated Test Framework (Correct Answer)

B) Source Control

C) Delegated Development

D) Flow Designer (Correct Answer)

Explanation

Correct Answer: AD ?

Community Discussion

Correct answer is A & D

A, B & D. The question is outdated as 3 are now supported in Global (A) Automated Test Framework, B) Source Control and D) Flow Designer). Delegated Development is not supported in Global scope. <https://www.servicenow.com/community/developer-forum/which-of-the-following-features-are-available-to-global/m-p/1391919> Global apps gained source control integration in the Paris release. <https://developer.servicenow.com/blog.do?p=/post/paris-source-control/> The delegated developer feature only works with true scoped apps, not global. <https://www.servicenow.com/community/developer-forum/globally-scoped-apps-and-delegated-developers/m-p/1862075>

Correct answer should be update as it is A, B, D with the recent integration of source control in Paris release.

A, B , D - ATFs and Flow Designer is available to Global not the Delegate Development. Also, after Paris release source control is available to Global apps as well

Question is outdated, global apps gained source control integration in the Paris release

Question #11

Which one of the following is NOT a UI Action type?

- A) List choice
- B) Form button
- C) List banner button
- D) Form choice (Correct Answer)**

Explanation

Correct Answer:

D

Reference:

https://docs.servicenow.com/bundle/orlando-platform-administration/page/administer/list-administration/task/t_EditingAUIAction.html

Community Discussion

Selected Answer: D

https://docs.servicenow.com/en-US/bundle/sandiego-platform-administration/page/administer/list-administration/concept/c_UIActions.html

https://docs.servicenow.com/bundle/washingtondc-platform-administration/page/administer/list-administration/concept/c_UIActions.html

Question #12

Which of the following is NOT supported by Flow Designer?

- A) Call a subflow from a flow
- B) Test a flow with rollback (Correct Answer)**
- C) Use Delegated Developer
- D) Run a flow from a MetricBase Trigger

Explanation

Correct Answer:

B

Reference:

https://community.servicenow.com/community?id=community_question&sys_id=b4d26e44db13ab409540e15b8a9619c9

Community Discussion

Selected Answer: B

Correct

B - I think they meant "Rollback action" which is available for Workflows only. However testing a flow in Flow Designer also does not offer rollback functionality. Record modified during a Test of a Flow remains modified when a Test is completed.

Question #13

Which of the following are true for reports in ServiceNow? (Choose three.)

A) Any user can see any report shared with them.

B) Can be a graphical representation of data. (Correct Answer)

C) All users can generate reports on any table.

D) Can be run on demand by authorized users. (Correct Answer)

E) Can be scheduled to be run and distributed by email. (Correct Answer)

Explanation

Correct Answer: BDE [?](#)

Community Discussion

Valid is BDE A is invalid because an user cannot see a shared report if has no access to a report's table(s) E is valid: <https://docs.servicenow.com/bundle/rome-platform->

administration/page/administer/reference-pages/task/schedule-report.html Generate and distribute scheduled reports via email.

BDE is right

Selected Answer: BDE

BDE is my answer

Selected Answer: BDE

yes BDE is correct according to docs.servicenow

VALID IS BDE

Question #14

Modules must have a Link type. Which one of the following is a list of Link types?

- A) List of Records, Separator, Catalog Type, Roles
- B) Assessment, List of Records, Separator, Timeline Page (Correct Answer)**
- C) List of Records, Content Page, Order, URL (from arguments:)
- D) Assessment, List of Records, Content Page, Roles

Explanation

Correct Answer:

B

Reference:

https://docs.servicenow.com/bundle/geneva-servicenow-platform/page/administer/navigation_and_ui/reference/r_ModuleLinkTypes.html

Community Discussion

Selected Answer: B

B is correct, all Link Type options are: Content Page, Documentation Link, HTML (from Arguments:), List Filter, List of Records, Map Page, New Record, Run a Report, Script (from

Arguments:), Search Screen, Separator, Single Record, Survey, Timeline Page, URL (from Arguments:)

B. Valid link for docs: https://docs.servicenow.com/bundle/utah-application-development/page/administer/auto-test-framework/reference/test-steps-app-navigator-category.html#title_r_ModuleLinkTypes

Selected Answer: B

B is correct

Question #15

Which one of the following is true for a table with the `Allow configuration` Application Access option selected?

- A) Only the in scope application's scripts can create Business Rules for the table
- B) Any user with the application's user role can modify the application's scripts
- C) Out of scope applications can create Business Rules for the table (Correct Answer)**
- D) Out of scope applications can add new tables to the scoped application

Explanation

Correct Answer:

C

Reference:

<https://community.servicenow.com/community?>

[id=community_question&sys_id=1a721819dbfa23409a64e15b8a9619d2](https://community.servicenow.com/community?id=community_question&sys_id=1a721819dbfa23409a64e15b8a9619d2)

Community Discussion

Option C is correct.

Selected Answer: C

https://developer.servicenow.com/dev.do#!/learn/learning-plans/tokyo/new_to_servicenow/app_store_learnv2_securingapps_tokyo_allow_configuration

A. Incorrect. "Catalog Type" is not a standard Link type for modules in ServiceNow. B. Incorrect. "Assessment" and "Timeline Page" are not standard Link types for modules in ServiceNow. C. Correct. This option includes standard Link types for modules in ServiceNow: List of Records: Displays a list of records from a specified table. Content Page: Links to a ServiceNow content page. Order: Represents an ordering of items (a separator that organizes other modules). URL (from arguments): Allows you to link to an external URL. D. Incorrect. "Assessment" is not a standard Link type for modules in ServiceNow.

Question #16

When working in the Form Designer, configuring the label of a field in a child table changes the label on which table(s)?

A) base table

B) child table (Correct Answer)

C) parent table

D) all tables

Explanation

Correct Answer:

B

Reference:

[https://community.servicenow.com/community?](https://community.servicenow.com/community?id=community_question&sys_id=7ddc4462dbe2b3840be6a345ca9619af)

[id=community_question&sys_id=7ddc4462dbe2b3840be6a345ca9619af](https://community.servicenow.com/community?id=community_question&sys_id=7ddc4462dbe2b3840be6a345ca9619af)

Community Discussion

Selected Answer: B

Child table

A is correct: <https://www.servicenow.com/community/developer-forum/when-working-in-form-designer-configuring-the-label-of-a-field/m-p/1436339/highlight/true#M93265>
System would not create a dictionary override automatically.

It creates Label not dict. override. It is B

It creates Label not dict. override. It is B

Selected Answer: B

B is correct

Question #17

Which one of the following is true?

A) A UI Policy's Actions execute before the UI Policy's Scripts (Correct Answer)

B) The execution order for a UI Policy's Scripts and Actions is determined at runtime

C) A UI Policy's Scripts execute before the UI Policy's Actions

D) A UI Policy's Actions and Scripts execute at the same time

Explanation

Correct Answer: A [?](#)

Community Discussion

Correct answer is A. I didn't find any definite statements about order in the docs. However in the link, quoted for this question, there are two opposite responses. One, which takes UI Policy Actions first and UI Policy Scripts second, was marked helpful by ServiceNow and Expert(s)

Selected Answer: A

A is correct, verified. Created UI policy on incident form, action set's cmdb_ci field as mandatory and script as not. result, field was not mandatory.

Selected Answer: C

Answer is C Just tested in San Diego PDI. UI Script's alert pops up, after closing the UI Action marks field mandatory.

In ServiceNow, UI Policies are used to dynamically change the behavior of form elements based on certain conditions. A UI Policy consists of both Scripts and Actions. Scripts: These are JavaScript code snippets that execute when the conditions specified in the UI

Policy are met. They are typically used for more complex logic and calculations. Actions: These are predefined operations that can be applied to form elements when the conditions are met. Examples include showing or hiding a field, making a field mandatory, or setting a default value. The correct order of execution is that the Scripts execute before the Actions. The JavaScript code in the Scripts section is evaluated first, and based on the results, the corresponding Actions are then executed. So, option C is the correct statement.

Hi I found the answer for this in the Scripting in ServiceNow Fundamentals - Tokyo page 157. The answer is A. UI Policy Actions execute before UI Policy Scripts.

Question #18

Here is the Business Rule script template:

```
(function executeRule (current, previous */null when async*/) {  
      
    }) (current, previous);
```

This type of JavaScript function is known as:

- A) Constructor
- B) Scoped
- C) Anonymous
- D) Self-invoking (Correct Answer)**

Explanation

Correct Answer: D [?](#)

Community Discussion

Correct answer is D: Self-invoking. Learn JavaScript!

Correct Answer is "D"

D, that's an IIFE which stands for immediately invoked Function Expression

Selected Answer: D

in javascript it's called self-invoking

in javascript it is called immediate invoked function /self invoking function

Question #19

Which method call returns true only if the currently logged in user has the catalog_admin role and in no other case?

- A) g_user.hasRole('catalog_admin')
- B) g_user.hasRoleExactly('catalog_admin') (Correct Answer)**
- C) g_user.hasRoleOnly('catalog_admin')
- D) g_user.hasRoleFromList('catalog_admin')

Explanation

Correct Answer: B ?

Community Discussion

Correct answer is B. There is no g_user.hasRoleOnly function

Answer is incorrect , It should be B

Selected Answer: B

Correct answer is B, there is no hasRoleOnly method in g_user

Selected Answer: B

B IS CORRECT

Can you guys update the correct answer? So far I've seen the "correct answer" be incorrect a little too many times and I'm not even a quarter of the way through these questions....the correct answer is B!!!

Question #20

There is a basic strategy when creating a Utils Script Include. Identify the step that does not belong.

A) Identify the table (Correct Answer)

- B) Script the function(s)
- C) Create a class
- D) Create a prototype object from the new class

Explanation

Correct Answer:

A

Community Discussion

A and D - You don't define the table for Script Include and also you don't create an instance of an object of the class. An object is created on a script invoking the class -level.

A is correct; Application Development Fundamentals - San Diego book page 343

Selected Answer: A

A is correct https://developer.servicenow.com/dev.do#!/learn/learning-plans/tokyo/new_to_servicenow/app_store_learnv2_scripting_tokyo_utilities_script_include

Selected Answer: A

On a Script Include you don't need to Identify the table.

The correct is A https://developer.servicenow.com/dev.do#!/learn/learning-plans/tokyo/new_to_servicenow/app_store_learnv2_scripting_tokyo_utilities_script_include

Question #21

Which roles grant access to source control repository operations such as importing applications from source control, or linking an application to source control?

(Choose two.)

A) source_control (Correct Answer)

B) source_control_admin

C) admin (Correct Answer)

D) git_admin

Explanation

Correct Answer:

AC

Reference:

https://docs.servicenow.com/bundle/orlando-application-development/page/build/applications/task/t_LinkAnApplicationToSourceControl.html

Community Discussion

https://docs.servicenow.com/bundle/tokyo-application-development/page/build/applications/task/t_LinkAnApplicationToSourceControl.html Based on tokyo release, only the admin can do it. For previous releases, source_control role is needed.

A and C. "Users with the admin or source_control role can use Studio to link a ServiceNow application to a repository." https://developer.servicenow.com/dev.do#!/learn/learning-plans/rome/new_to_servicenow/app_store_learnv2_devenvironment_rome_linking_an_application_to_source_control

A and C are correct: A.) https://docs.servicenow.com/bundle/tokyo-application-development/page/build/applications/task/t_ImportAppFromSourceControl.html C.) https://docs.servicenow.com/bundle/tokyo-application-development/page/build/applications/task/t_LinkAnApplicationToSourceControl.html

Question #22

When configuring the content of an Email Notification, which syntax should be used to reference the properties of an event triggering the Notification?

A) \${event.<property name>} (Correct Answer)

B) \${current.<property name>}

C) \${<property name>.getDisplayValue()}

D) \${gs.<property name>}

Explanation

Correct Answer: A ?

Community Discussion

\${event.<property name>} should be answer

Answer :A

Selected Answer: A

Answer: A

Answer: A. <https://www.servicenow.com/community/it-service-management-forum/email-notification/m-p/695221>

When you pass an event, you pass a record and two parameters, this does not ask if you want to access the parameters, which would need the \${event.parm1} syntax, but it asks to access the properties of the event, which would be the record being passed with it. which can be accessed by using the field name directly. so \${property_name} would work, and so should \${property_name.getDisplayValue} to get its display value instead of actual value. the trigger for an event is gs.eventQueue(<EVENT NAME>, <RECORD OBJECT>, PARM1, PARM2) you can access a field within the record object by simply using \${field_Name}

Question #23

Which one of the following is true for a Script Include with a Protection Policy value of Protected?

- A) Any user with the protected_edit role can see and edit the Script Include
- B) The Protection policy option can only be enabled by a user with the admin role
- C) The Protection Policy is applied only if the glide.app.apply_protection system property value is true

D) The Protection Policy is applied only if the application is downloaded from the ServiceNow App Store (Correct Answer)

Explanation

Correct Answer: D [?](#)

Community Discussion

Valid answer is D: https://docs.servicenow.com/bundle/rome-application-development/page/build/applications/concept/c_ScriptProtectionPolicy.html Answer by Chuck Tomasi: https://community.servicenow.com/community?id=community_question&sys_id=530ff629db58dbc01dcaf3231f9619d7 This field is mainly intended for our TPP (technical partner program) - those people who create apps and publish them to the store.

Correct Answer :D

Selected Answer: D

Valid is D

Selected Answer: D

answer is D! Did a robot create the test? The official answer makes no sense at all.

Selected Answer: D

D is right

Question #24

Which one of the following is true for GlideUser (g_user) methods?

- A) Can be used in Client Scripts and UI Policies only
- B) Can be used in Business Rules only
- C) Can be used in Client Scripts, UI Policies, and UI Actions (Correct Answer)**
- D) Can be used in Business Rules, and Scripts Includes

Explanation

Correct Answer:

C

Reference:

https://developer.servicenow.com/dev.do#!/reference/api/newyork/client/c_GlideUserAPI

Community Discussion

Selected Answer: C

The correct answer is C, although GlideUser is not COMMONLY used in UI Actions, you can make a UI Action run client side. Running a UI action client side is also how you integrate GlideModal and other client operations with a UI Action. Tricky question, but the answer is C.

Selected Answer: A

The link being shared says that the GlideUser API cannot be used in UI actions that run on the server. This question doesn't specify if the UI Action runs on the client or on the server. For that reason, I believe the correct answer is A. The GlideUser is typically used in client scripts and UI policies. Unless it is specified where the UI Action is running I will not assume is on the client side. A very tricky question indeed.

Selected Answer: C

"CAN" is a key word interpretation that needs to be understood for this question. "Can be used in Client Scripts, UI Policies, and UI Actions" as is mentioned below. Read these details carefully. https://developer.servicenow.com/dev.do#!/reference/api/tokyo/client/c_GlideUserAPI

C is correct - Can be used in Client Scripts, UI Policies, and UI Actions. https://developer.servicenow.com/dev.do#!/reference/api/tokyo/client/c_GlideUserAPI

GlideUser The GlideUser API provides access to information about the current user and current user roles. Using the GlideUser API avoids the need to use the slower GlideRecord queries to get user information. The GlideUser methods and properties are accessed through a global object (g_user) that is only available in client scripts. GlideUser contains name and role information about the current user. is typically used in client scripts and UI policies but is also found in UI actions that run on the client. cannot be used in business rules or UI actions that run on the server. (Refer:https://developer.servicenow.com/dev.do#!/reference/api/tokyo/client/c_GlideUserAPI)

Question #25

When configuring a module, what does the Override application menu roles configuration option do?

A) Users with the module role but without access to the application menu access the module (Correct Answer)

- B) Self-Service users can access the module even though they do not have roles
- C) Admin is given access to the module even if Access Controls would ordinarily prevent access
- D) Users with access to the application menu can see the module even if they don't have the module role

Explanation

Correct Answer: A [?](#)

Community Discussion

Correct answer is A. The reference link, provided for the question, confirms that: Override application menu roles : Allows users to access this module even if they do not have permission to view the containing application menu. Users must still meet the role requirements for this module.

Correct Answer :A

Selected Answer: A

Option A

Selected Answer: A

Answer: A

A is right answer

Question #26

Which platform feature can be used to determine the relationships between field in an Import Set table to field in an existing ServiceNow table?

- A) Business Service Management Map
- B) Data Sources
- C) Transform Map (Correct Answer)**
- D) CI Relationship Builder

Explanation

Correct Answer:

C

A transform map determines the relationships between fields displaying in an Import Set table and fields in an existing ServiceNow table, such as the Incidents or Users table.

Reference:

[https://community.servicenow.com/community?](https://community.servicenow.com/community?id=community_question&sys_id=69fc8369db9cdbc01dcaf3231f961935)

Community Discussion

Selected Answer: C

Transform map is correct

C. Transform Map - correct

Question #27

When configuring a REST Message, the Endpoint is:

- A) The commands to the REST script to stop execution
- B) The URI of the data to be accessed, queried, or modified (Correct Answer)**
- C) Information about the format of the returned data
- D) The response from the provider indicating there is no data to send back

Explanation

Correct Answer:

B

Reference:

https://docs.servicenow.com/bundle/orlando-application-development/page/integrate/outbound-rest/reference/r_RESTMessageElements.html

Community Discussion

Selected Answer: B

The endpoint is the URL of the data to be retrieved, updated, or deleted. https://docs.servicenow.com/bundle/utah-api-reference/page/integrate/outbound-rest/reference/r_RESTMessageElements.html

Selected Answer: B

B is correct base on Lab 9.2 number 5 (page 455 of SN CAD ebook)

Question #28

When evaluating Access Controls, ServiceNow searches and evaluates:

- A) Only for matches on the current table
- B) Only for matches on the current field
- C) From the most specific match to the most generic match (Correct Answer)**
- D) From the most generic match to the most specific match

Explanation

Correct Answer: C ?

Community Discussion

Correct is C. https://developer.servicenow.com/dev.do#!/learn/learning-plans/paris/new_to_servicenow/app_store_learnv2_securingapps_paris_access_controls_evaluation_order

Answer :C

Selected Answer: C

Option C

Selected Answer: C

Answer: C

Selected Answer: C

https://developer.servicenow.com/dev.do#!/learn/learning-plans/tokyo/new_to_servicenow/app_store_learnv2_securingapps_tokyo_access_controls_evaluation_order

Question #29

In a Business Rule, which one of the following returns true if the currently logged in user has the admin role?

- A) g_form.hasRoleExactly('admin')
- B) gs.hasRole('admin') (Correct Answer)**
- C) g_form.hasRole('admin')
- D) gs.hasRoleExactly('admin')

Explanation

Correct Answer: B ?

Community Discussion

Correct answer is B. gs.hasRole Business Rule is server-side, so it uses GlideSystem API. gs.hasRoleExactly doesn't exist

Correct ans :B

Selected Answer: B

Correct Answer is B

gs.hasRole is correct. g_form.hasRole and g_form.hasRoleExactly not exist

Selected Answer: B

server side is gs

Question #30

From the list below, identify one reason an application might NOT be a good fit with ServiceNow.

The application:

- A) Needs workflow to manage processes
- B) Requires use of low-level programming libraries (Correct Answer)**
- C) Requires reporting capabilities
- D) Uses forms extensively to interact with data

Explanation

Correct Answer:

B

Community Discussion

Selected Answer: B

ServiceNow doesn't support libraries with low-level programming, they support their own API with low-code functionalities.

Selected Answer: B

B is correct

Selected Answer: B

b is correct

Question #31

Identify the incorrect statement about Delegated Development in ServiceNow.

A) Administrators can grant non-admin users the ability to develop global applications.

(Correct Answer)

B) Administrators can specify which application file types the developer can access.

C) Administrators can grant the developer access to script fields.

D) Administrators can grant the developer access to security records.

Explanation

Correct Answer: A ?

Community Discussion

Correct answer is: A. Administrators can grant non-admin users the ability to develop global applications. Delegated Development is for the scoped applications only

Correct Answer :A

Selected Answer: A

A is correct

Selected Answer: A

Delegated Development is for the scoped applications only

Selected Answer: A

Applies only to scoped apps

Question #32

One of the uses of the ServiceNow REST API Explorer is:

- A) Practice using REST to interact with public data providers
- B) Find resources on the web for learning about REST
- C) Convert SOAP Message functions to REST methods

D) Create sample code for sending REST requests to ServiceNow (Correct Answer)

Explanation

Correct Answer:

D

Reference:

https://developer.servicenow.com/dev.do#!/learn/courses/newyork/app_store_learnv2_rest_newyork_rest_integrations/
[app_store_learnv2_rest_newyork_inbound_rest_integrations/](https://developer.servicenow.com/dev.do#!/learn/courses/newyork/app_store_learnv2_rest_newyork_inbound_rest_integrations/)

Community Discussion

Selected Answer: D

D is correct - SN CAD ebook pg 394

Question #33

Which one of the following is true regarding Application Scope?

- A) All applications are automatically part of the Global scope
- B) Applications downloaded from 3 party ServiceNow application developers cannot have naming conflicts rd (Correct Answer)**
- C) Any developer can edit any application
- D) Developers can choose the prefix for a scope's namespace

Explanation

Correct Answer: B [?](#)

Community Discussion

Correct answer is B. https://docs.servicenow.com/bundle/rome-application-development/page/build/applications/concept/c_ApplicationScope.html

Selected Answer: B

https://docs.servicenow.com/bundle/rome-application-development/page/build/applications/concept/c_ApplicationScope.html

Selected Answer: D

B and D are correct. B: import App from Store or Source control must not be conflict with existing ones D: for client-instance, it can be any. But for personal instance, it needs some prefix number before the app name

B is correct Applications downloaded from 3 party ServiceNow application developers cannot have naming conflicts rd

Selected Answer: B

correct ans is B

Question #34

Which one of the following is the baseline behavior of a table in a privately-scoped application?

- A) The table and its data are not accessible using web services
- B) Any Business Rule can read, write, delete, and update from the table
- C) Only artifacts in the table's application can read from the table

D) All application scopes can read from the table (Correct Answer)

Explanation

Correct Answer:

D

Community Discussion

Correct is indeed D: https://docs.servicenow.com/bundle/rome-application-development/page/build/applications/concept/c_DefaultDesignAccessPermissions.html

Selected Answer: D

https://docs.servicenow.com/bundle/tokyo-application-development/page/build/applications/concept/c_DefaultDesignAccessPermissions.html

Selected Answer: D

The correct answer is D

Yes, the correct Answer is D

Question #35

Which one of the following is NOT a purpose of application scoping?

- A) Provide a relationship between application artifacts
- B) Provide a way of tracking the user who developed an application (Correct Answer)**
- C) Provide a namespace (prefix and scope name) to prevent cross application name collisions

D) Provide controls for how scripts from another scope can alter tables in a scoped application

Explanation

Correct Answer: B ?

Community Discussion

Selected Answer: B

Option B

Correct Answer :A

Correct answer is A. Provide a relationship between application artifacts IMHO :)

Option B is correct

Selected Answer: B

Correct answer is B

Question #36

It is best practice to define the business requirements and the process(es) an application will manage as part of the application development plan. What are some of the considerations to document as part of the business process?

A) Business problem, data input/output, users/stakeholders, and process steps (Correct Answer)

B) Business problem, data input/output, project schedule, and process steps

C) Business problem, data input/output, users/stakeholders, and database capacity

D) Business problem, users/stakeholders, available licenses, and database capacity

Explanation

Correct Answer:

A

Community Discussion

Selected Answer: A

A is correct

Selected Answer: A

Explanation: Business problem - If you are not solving a business problem, you do not need an application. Stakeholders - Requestor and Fulfiller, Application Administrator, Management. Users - Personas largely equate to Roles in ServiceNow. Inputs - can take many forms such as Users, spreadsheets, and web services. Outputs: can also take many forms such as dashboards, reports, and email. Process Steps - There are many strategies for defining a process, such as SIPOC(Six Sigma), ASME Standard for Process Charts, and others. Choose a strategy that works well for you. <https://docs.servicenow.com/bundle/vancouver-governance-risk-compliance/page/product/grc-risk/concept/business-process-overview.html>

Yes A is correct

Selected Answer: A

I agree that "Business problem, data input/output, users/stakeholders, and process steps" are correct.

Question #37

Which of the following statements does NOT apply when extending an existing table?

- A) The parent table's Access Controls are evaluated when determining access to the new table's records and fields
- B) The new table inherits the functionality built into the parent table
- C) The new table inherits all of the fields from the parent table
- D) You must script and configure all required behaviors (Correct Answer)**

Explanation

Correct Answer: D ?

Community Discussion

Correct answer is D. You must script and configure all required behaviors. Provided link has this statement: Extending an existing ServiceNow table means the new table inherits the parent table's columns as well as its business logic.

Correct Answer is D

I need my money back. So many questions are absolutely wrong. Absolute garbage!!

D is the correct answer

Selected Answer: D

D is correct

Question #38

Which of the following CANNOT be debugged using the Field Watcher?

- A) Business Rules
- B) Script Includes (Correct Answer)**
- C) Client Scripts
- D) Access Controls

Explanation

Correct Answer:

B

Reference:

https://docs.servicenow.com/bundle/orlando-application-development/page/script/debugging/concept/c_FieldWatcher.html

Community Discussion

Selected Answer: B

Just opened the field watcher in a Vancouver PDI and these are the options: ACL Business rule Client Script Data lookup Data policy UI Policy UI action Workflow activity Reference qualifier

Selected Answer: D

Access control can not be debugged by feed watcher

Why do you think so?

Why do you think so?

Selected Answer: B

B is correct

Question #39

Which objects can be used in Inbound Action scripts?

- A) current and previous
- B) current and email (Correct Answer)**
- C) current and event
- D) current and producer

Explanation

Correct Answer: B [?](#)

Community Discussion

Technically both B and C are correct: (function runAction(/*GlideRecord*/ current, /*GlideRecord*/ event, /*EmailWrapper*/ email, /*ScopedEmailLogger*/ logger) { // Implement email action here })(current, event, email, logger);

Should be B. There is no access to event in inbound action

Utah PDI: When checking System Policy > Email > Inbound Actions and creating new Inbound action The function runAction() Has parameters current,event,email However event is striked and marked as deprecated, thats why B is correct.

Selected Answer: B

event is deprecated in inbound email action

Selected Answer: B

Definitely B - current and email "event" really has no purpose as inbound email actions are always triggered by "email.read".

Question #40

Which one of the following is part of the client-side scripting API?

- A) workflow.scratchpad
- B) GlideUser object (g_user) (Correct Answer)**
- C) current and previous objects
- D) GlideSystem object (gs)

Explanation

Correct Answer: B [?](#)

Community Discussion

Correct answer is B. GlideUser object (g_user) <https://developer.servicenow.com/dev.do#!/reference/api/rome/client>

Selected Answer: B

B is the correct answer

Selected Answer: B

Open a client script record, you will see.

Selected Answer: B

C is not correct

Selected Answer: B

B is correct

Question #41

Application developers configure ServiceNow using industry standard JavaScript to`!

A) Enable the right-click to edit the context menus on applications in the navigator

B) Extend and add functionality (Correct Answer)

C) Customize the organization's company logo and banner text

D) Configure the outgoing email display name

Explanation

Correct Answer:

B

Community Discussion

Selected Answer: B

Base on SN CAD ebook pg 10

Selected Answer: B

Correct answer is B

Question #42

How many applications menus can an application have?

A) 3, one for an application's user modules, one for an application's administrator modules, and

one for the ServiceNow administrator's modules

B) As many as the application design requires (Correct Answer)

C) 2, one for an application's user modules and one for an application's administrator modules

D) 1, which is used for all application modules

Explanation

Correct Answer:

B

Reference:

https://docs.servicenow.com/bundle/orlando-platform-user-interface/page/administer/navigation-and-ui/task/t_CreateAnApplicationMenu.html

Community Discussion

Selected Answer: B

B is correct

I just created 2 and it works, so I think as many as needed

I just created 2 and it works, so I think as many as needed

final answer guys?

Selected Answer: B

Correct answer is B. D answer is a best practice, but technically you can create as many applications menus as needed.

Question #43

The source control operation used to store local changes on an instance for later application is called a(n) <blank>.

A) Branch

B) Tag

C) Stash (Correct Answer)

D) Update set

Explanation

Correct Answer:

C

Reference:

https://docs.servicenow.com/bundle/orlando-application-development/page/build/applications/task/t_StashLocalChanges.html

Community Discussion

I am leaning more towards stashing. "Stashing in source control saves local changes for an application to apply later. The local changes do not need to be committed to the remote repository. Stashing a change removes the change from the current application and saves the change for a developer to later apply or delete." https://developer.servicenow.com/dev.do#!/learn/learning-plans/utah/new_to_servicenow/app_store_learnv2_devenvironment_utah_stashing_changes#:~:text=To%20stash%20something%20is%20t

Selected Answer: C

Stash is correct SN CAD ebook pg102

Selected Answer: C

https://developer.servicenow.com/dev.do#!/learn/learning-plans/utah/new_to_servicenow/app_store_learnv2_devenvironment_utah_stashing_changes

i think the answer should be A

C is correct. git stash - temporarily shelves (or stashes) changes you've made to your working copy so you can work on something else, and then come back and re-apply them later on

Question #44

What syntax is used in a Record Producer script to access values from Record Producer form fields?

- A) `producer.field_name`
- B) `producer.variablename` (Correct Answer)**
- C) `current.variable_name`
- D) `current.field_name`

Explanation

Correct Answer:

B

Reference:

https://community.servicenow.com/community?id=community_question&sys_id=cc3803addb1cdbc01dcaf3231f9619b6

Community Discussion

The forum link attached to the given answer B is a question pertaining to a variable not a field. A is correct. For example, you can write `current.<field name> = producer.<field name>` in Record Producer script.

B is correct Use `current.*FIELD_NAME*` to reference fields on the record being created. Use `producer.*VARIABLE_NAME*` to reference values entered by the end user. https://docs.servicenow.com/en-US/bundle/vancouver-servicenow-platform/page/product/service-catalog-management/concept/c_PopulatingRecordData.html

Selected Answer: A

Option A is correct as Option B gives data for newly created records not for existing ones

B is correct - Use `producer.*VARIABLE_NAME*` to reference values entered by the end user.

Selected Answer: B

B is correct

Question #45

Which of the following methods prints a message on a blue background to the top of the current form by default?

- A) `g_form.addInfoMsg()`
- B) `g_form.addInfoMessage()` (Correct Answer)**
- C) `g_form.showFieldMessage()`
- D) `g_form.showFieldMsg()`

Explanation

Correct Answer: B ?

Community Discussion

Answer should be B.

Answer should be B

Selected Answer: B

Answer is B

From: https://docs.servicenow.com/bundle/paris-application-development/page/script/general-scripting/reference/r_ScriptingAlertInfoAndErrorMsgs.html
`g_form.showFieldMsg("field_name", "Hello World", "error");` Puts "Hello World" in an error message **below the specified field**.
`g_form.addInfoMessage()` or `g_form.addErrorMessage()` place a blue box message at the top of the screen. Pg 126 of the CAD handbook

Selected Answer: B

https://developer.servicenow.com/dev.do#!/reference/api/tokyo/client/c_GlideFormAPI#r_GlideFormAddInfoMessage_String

Question #46

A scoped application containing Flow Designer content dedicated to a particular application is called a(n):

A) Spoke (Correct Answer)

B) Bundle

C) Action

D) Flow

Explanation

Correct Answer:

A

A spoke is a scoped application containing Flow Designer content dedicated to a particular application or record type. Flow Designer provides a set of core actions to automate Now Platform® processes. You can add application-specific core actions by activating the associated spoke.

Reference:

https://community.servicenow.com/community?id=community_blog&sys_id=7b3af354db93ab80afc902d5ca9619bc

Community Discussion

Selected Answer: A

<https://docs.servicenow.com/bundle/paris-servicenow-platform/page/administer/flow-designer/concept/spokes.html>

Answer is A, Spoke

Selected Answer: A

A is correct

Selected Answer: D

Answer is Flow

A is correct. A spoke is a scoped application that includes Flow Designer custom actions or subflows. A spoke is a logical grouping of related custom actions, subflows, and supporting application files. Developers can reuse spoke logic in their own applications. Flow Designer includes baseline spokes

Question #47

What is a Module?

A) The functionality within an application menu such as opening a page in the content frame or a separate tab or window (Correct Answer)

B) A group of menus, or pages, providing related information and functionality to end-users

C) A way of helping users quickly access information and services by filtering the items in the Application Navigator

D) A web-based way of providing software to end-users

Explanation

Correct Answer: A ?

Community Discussion

Correct answer is B. A group of menus, or pages, providing related information and functionality to end-users https://docs.servicenow.com/bundle/rome-platform-user-interface/page/use/navigation/concept/c_ApplicationNavigation.html An application is a group of modules, or pages, that provide related information and functionality in an instance

Selected Answer: A

Answer A is correct IMHO

Here is the reference from documentation: https://docs.servicenow.com/bundle/rome-platform-user-interface/page/administer/navigation-and-ui/task/t_CreateAModule.html

Here is the reference from documentation: https://docs.servicenow.com/bundle/rome-platform-user-interface/page/administer/navigation-and-ui/task/t_CreateAModule.html

Answer is A already taken the exam

Question #48

Which source control operation is available from BOTH Studio and the Git Repository?

A) Create Branch (Correct Answer)

- B) Apply Remote Changes
- C) Stash Local Changes
- D) Edit Repository Configurations

Explanation

Correct Answer: A ?

Community Discussion

Correct answer is A - check SNOW documentation

Selected Answer: A

https://docs.servicenow.com/bundle/rome-application-development/page/build/applications/reference/r_AvailableSourceControlOperations.html#:~:text=The%20source%20control%20integration%20primarily,directly

Selected Answer: A

Create a Branch

https://docs.servicenow.com/bundle/tokyo-application-development/page/build/applications/reference/r_AvailableSourceControlOperations.html Updated link also showing A is right.

https://docs.servicenow.com/bundle/tokyo-application-development/page/build/applications/reference/r_AvailableSourceControlOperations.html Updated link also showing A is right.

Question #49

Which one of the following is NOT required to link a ServiceNow application to a Git repository?

- A) Password
- B) URL
- C) User name

D) Application name (Correct Answer)

Explanation

Correct Answer:

D

Reference:

https://docs.servicenow.com/bundle/orlando-application-development/page/build/applications/task/t_LinkAnApplicationToSourceControl.html

Community Discussion

Correct link: https://docs.servicenow.com/bundle/vancouver-application-development/page/build/applications/task/t_LinkAnApplicationToSourceControl.html

Question #50

Which Report Type(s) can be created by right-clicking on a column header in a table's list?

- A) Bar Chart, Pie Chart, Histogram, and Line
- B) Bar Chart
- C) Bar Chart, Pie Chart, and Histogram

D) Bar Chart and Pie Chart (Correct Answer)

Explanation

Correct Answer: D [?](#)

Community Discussion

Selected Answer: D

Answer: D

Selected Answer: D

Pie Chart and Bar Chart

Selected Answer: D

D is right

Selected Answer: D

Bar Chart , Pie Chart

Selected Answer: D

Right click on a list of records, we can create Bar Chart , Pie Chart.

Question #51

Which one of the following is NOT a method used for logging messages in a server-side script for a privately-scoped application?

A) gs.log() (Correct Answer)

B) gs.error()

C) gs.warn()

D) gs.debug()

Explanation

Correct Answer:

A

Reference:

<https://community.servicenow.com/community?>

[id=community_question&sys_id=bd71cb29db98dbc01dcaf3231f9619c6](https://community.servicenow.com/community?id=community_question&sys_id=bd71cb29db98dbc01dcaf3231f9619c6)

Community Discussion

Scoped Application Script Logging `gs.print()` and `gs.log()` are older and not available in scoped applications, whereas `gs.debug()`, `gs.info()`, `gs.warn()`, `gs.error()` work in both scoped applications and global are therefore are more versatile going forward in future versions.

`gs.print()` and `gs.log()` are older and not available in scoped applications, whereas `gs.debug()`, `gs.info()`, `gs.warn()`, `gs.error()` work in both scoped applications and global are therefore are more versatile going forward in future versions. Reference: https://developer.servicenow.com/dev.do#!/guides/utah/now-platform/tpb-guide/debugging_best_practices

Question #52

If the Create module field is selected when creating a table, what is the new module's default behavior?

- A) Open an empty form so new records can be created
- B) Open a link to a wiki article with instructions on how to customize the behavior of the new module
- C) Display an empty homepage for the application
- D) Display a list of all records from the table (Correct Answer)**

Explanation

Correct Answer:

D

Community Discussion

Selected Answer: D

List of records is the default

Selected Answer: D

https://docs.servicenow.com/en-US/bundle/utah-platform-administration/page/administer/table-administration/task/t_CreateATable.html

Link type is default to list of records

Question #53

How must Application Access be configured to prevent all other private application scopes from creating configuration records on an application's data tables?

- A) You must create Access Controls to prevent all other application scopes from creating configuration records on an application's data tables rather than using Application Access
- B) Set the Accessible from field value to All application scopes and de-select the Can create option
- C) Set the Accessible from field value to This application scope only and de-select the Allow access to this table via web services option

D) Set the Accessible from field value to This application scope only (Correct Answer)

Explanation

Correct Answer: D ?

Community Discussion

Correct answer is D. When Accessible from is set to "This app scope only", then "Allow configuration" is unchecked and read-only

I would say both B and D could be correct, however, D would also disable the read/update/delete, not just the create function. The question isn't clear whether the table should still be readable by others or not.

Selected Answer: D

answer is D

D - Reference Note: If you set Accessible From to This Application Scope Only, it automatically unchecks and greys out Web Services so it can't be C https://docs.servicenow.com/bundle/rome-application-development/page/build/applications/concept/c_ExampleDenyingAllDesignAccess.html

Selected Answer: B

B is the correct answer

Question #54

What are some of the benefits of extending an existing table such as the Task table when creating a new application? a) You can repurpose existing fields by simply changing the label. b) Use existing fields with no modifications. c) Existing logic from the parent table will be automatically applied to the new table. d) All of the parent table records are copied to the new table.

A) a, b, c, and d

B) a and b

C) b and c

D) a, b, and c (Correct Answer)

Explanation

Correct Answer: D ?

Community Discussion

Selected Answer: D

D is the correct answer

Selected Answer: D

D is the correct answer. This study guide is honestly the most inaccurate guide I've come across. I definitely will get my money back for this garbage.

Selected Answer: D

D is the right answer, "you can repurpose existing fields by simply change the label" is mentioned in the ADF course.....

Selected Answer: D

D is correct

D, records do not come with table

Question #55

When configuring an Access Control which has no condition or script, which one of the following statements is NOT true?

- A) table.*will grant access to every field in a record
- B) table.None will grant access to every record on the table
- C) table.field will grant access to a specific field in a record

D) table.id will grant access to a specific record on the table (Correct Answer)

Explanation

Correct Answer: D ?

Community Discussion

Selected Answer: D

D is the correct answer

Selected Answer: D

No such thing as "table.id" for ACL. Go on - do a Google search - nothing relevant comes up.

B. table.None grants access to all fields and since there is no condition or script, every record is accessible.

Never mind, the answer is D. I misread the question.

Never mind, the answer is D. I misread the question.

Question #56

Which of the following methods are useful in Access Control scripts?

- A) `g_user.hasRole()` and `current.isNewRecord()`
- B) `gs.hasRole()` and `current.isNewRecord()` (Correct Answer)**
- C) `g_user.hasRole()` and `current.isNew()`
- D) `gs.hasRole()` and `current.isNew()`

Explanation

Correct Answer:

B

Reference:

<http://servicenowmypath.blogspot.com/2017/>

Community Discussion

https://developer.servicenow.com/dev.do#!/learn/learning-plans/vancouver/new_to_servicenow/app_store_learnv2_securingapps_vancouver_creating_and_editing_access_controls

Selected Answer: B

glideSystem options: `getUser()`, `getUserID()`, `getUserName()`, `hasRole(Object role)`, `isLoggedIn()`, `isInteractive()`, `getSession()`

Question #57

Which one of the following client-side scripts apply to Record Producers?

- A) Catalog Client Scripts and Catalog UI Policies (Correct Answer)**
- B) UI Scripts and UI Actions
- C) UI Scripts and Record Producer Scripts

D) Client Scripts and UI Policies

Explanation

Correct Answer:

A

Reference:

https://docs.servicenow.com/bundle/orlando-application-development/page/script/client-scripts/concept/c_CatalogClientScriptCreation.html

Community Discussion

Selected Answer: A

A is correct

A is correct

D ?? there are no catalog UIs but category UI can be

There is. https://docs.servicenow.com/bundle/utah-api-reference/page/script/client-scripts/concept/c_CatalogClientScriptCreation.html https://docs.servicenow.com/bundle/utah-servicenow-platform/page/product/service-catalog-management/task/t_CreatUIPolicyForSvcCalgIt.html

There is. https://docs.servicenow.com/bundle/utah-api-reference/page/script/client-scripts/concept/c_CatalogClientScriptCreation.html https://docs.servicenow.com/bundle/utah-servicenow-platform/page/product/service-catalog-management/task/t_CreatUIPolicyForSvcCalgIt.html

Question #58

When a ServiceNow instance requests information from a web service, ServiceNow is the web service:

- A) Publisher
- B) Specialist
- C) Provider

D) Consumer (Correct Answer)**Explanation****Correct Answer:**

D

Reference:

https://docs.servicenow.com/bundle/orlando-application-development/page/integrate/web-services/reference/r_AvailableWebServices.html

Community Discussion**Selected Answer: D**

"A web service consumer (client) requests information from a web service provider (server). A web service provider processes the request and returns a status code and a response body." https://developer.servicenow.com/dev.do#!/learn/learning-plans/tokyo/technology_partner_program_1/app_store_learnv2_rest_tokyo_servicenow_as_a_web_service_consumer

Selected Answer: D

d is ok

Question #59

Which one of the following is the fastest way to create and configure a Record Producer?

A) Create a Catalog Category, open the category, and select the Add New Record Producer button

B) Use the Record Producer module then add and configure all variables manually

C) Open the table in the Table records and select the Add to Service Catalog Related Link (Correct Answer)

D) Open the table's form, right-click on the form header, and select the Create Record Producer menu item

Explanation

Correct Answer: [C ?](#)

Community Discussion

Selected Answer: C

C is the correct as the simplest way is to click the related link which say "Publish to Service catalog"

Selected Answer: C

C is correct

This also how it is done in the ADF course lab.

Selected Answer: C

is told in course

C is correct

Question #60

Which objects can you use in a Scheduled Script Execution (Scheduled Job) script?

- A) GlideRecord and current
- B) GlideUser and GlideRecord
- C) GlideSystem and GlideRecord (Correct Answer)**
- D) GlideSystem and current

Explanation

Correct Answer: [C ?](#)

Community Discussion

Correct answer is C. You can only use server side scripting in Scheduled Jobs.

Selected Answer: C

it has no access to current: https://developer.servicenow.com/dev.do#!/learn/learning-plans/tokyo/servicenow_administrator/app_store_learnv2_automatingapps_tokyo_scheduled_script_execution_scripts

Selected Answer: C

there is no user nor current in scheduled job

Selected Answer: C

C is correct - you don't have a user or current in a scheduled job

Selected Answer: C

C is correct

Question #61

Can inherited fields be deleted from a table?

- A) Yes, select the red X in the left-most column in the table definition
- B) Yes, but only if they are text fields
- C) Yes, but only if there has never been any saved field data
- D) No, inherited fields cannot be deleted from a child table (Correct Answer)**

Explanation

Correct Answer: D [?](#)

Community Discussion

Selected Answer: D

Cannot be deleted from child table directly, you need to open the record and then delete it.

Selected Answer: D

D is correct

Selected Answer: D

Cannot delete

Selected Answer: D

D is correct

D, Per CAD class slide from SNOW

Question #62

What is the purpose of the Application Picker?

- A) Select an application to run
- B) Select an application as a favorite in the Application Navigator
- C) Choose an application to edit and set the Application Scope (Correct Answer)**
- D) Choose an application to download and install

Explanation

Correct Answer: [C ?](#)

Community Discussion

Selected Answer: C

C is the correct answer in this case

Selected Answer: C

It is C. All other make no sense!

Selected Answer: C

https://docs.servicenow.com/bundle/tokyo-application-development/page/build/applications/concept/c_ApplicationPicker.html

Selected Answer: C

C is correct

Selected Answer: C

"The application picker allows application developers to view and select the application where their changes apply" https://docs.servicenow.com/bundle/tokyo-application-development/page/build/applications/concept/c_ApplicationPicker.html

Question #63

What are Application Files in a ServiceNow application?

- A) An XML export of an application's table records
- B) CSV files containing data imported into an application
- C) ServiceNow artifacts comprising an application (Correct Answer)**
- D) XML exports of an application's Update Set

Explanation

Correct Answer: C ?

Community Discussion

Selected Answer: C

Application Files is the related list under an application record. It contains all artifacts that are part of that application.

C is the correct answer

Selected Answer: C

C is correct

Selected Answer: C

C is the one. rest all contains partial info about application

Application files are configuration records that allow developers to extend application functionality.

Question #64

Which one of the following is NOT true for Modules?

- A) Modules open content pages
- B) Access to Modules is controlled with roles
- C) Every Module must be part of an Application Menu
- D) Every Module must be associated with a table (Correct Answer)**

Explanation

Correct Answer:

D

Reference:

Community Discussion

Selected Answer: D

d is the answer

what stophs said

Question #65

A graphical view of relationships among tables is a <blank>.

- A) Schema map (Correct Answer)**

- B) Dependency view
- C) Graphical User Interface
- D) Map source report

Explanation

Correct Answer:

A

Reference:

https://docs.servicenow.com/bundle/paris-platform-administration/page/administer/table-administration/concept/c_TableAdministration.html

Community Discussion

Selected Answer: A

"Schema map: Provides a graphical representation of the relationships between tables."

https://docs.servicenow.com/bundle/tokyo-platform-administration/page/administer/table-administration/concept/c_TableAdministration.html

A. Schema map is correct

Selected Answer: A

I agree, its A

Question #66

Which one of the following is true for the Application Picker?

A) All custom application scope and the Global scope appear in the Application Picker (Correct Answer)

- B) All applications in ServiceNow, including baseline applications like Incident, appear in the Application Picker
- C) Only custom applications appear in the Application Picker
- D) Only downloaded applications appear in the Application Picker

Explanation

Correct Answer:

A

Reference:

https://docs.servicenow.com/bundle/paris-application-development/page/build/applications/task/t_SelectAnAppFromTheAppPicker.html

Community Discussion

Selected Answer: A

https://docs.servicenow.com/bundle/tokyo-application-development/page/build/applications/task/t_SelectAnAppFromTheAppPicker.html

Selected Answer: A

A is correct.

Question #67

When creating an application through the Guided Application Creator, which of the following is a user experience option?

A) Portal

B) Mobile (Correct Answer)

C) Self-service

D) Workspace

Explanation

Correct Answer:

B

Reference:

<https://docs.servicenow.com/bundle/quebec-application-development/page/build/guided-app-creator/concept/guided-app-creator.html>

Community Discussion

Selected Answer: B

<https://docs.servicenow.com/bundle/tokyo-application-development/page/build/guided-app-creator/concept/guided-app-creator.html>

Selected Answer: B

The only options are mobile and classic, so B is correct.

Question #68

When writing a Client Script to provide feedback targeted at a specific field, which method should be used?

- A) `g_form.showInfoMessage()`
- B) `g_form.showFieldMsg()` (Correct Answer)**
- C) `g_form.addInfoMessage()`
- D) `g_form.addFieldMsg()`

Explanation

Correct Answer:

B

Reference:

<https://docs.servicenow.com/bundle/paris-application-development/page/script/client-scripts/concept/client-script-best-practices.html>

Community Discussion

Selected Answer: B

https://docs.servicenow.com/bundle/tokyo-application-development/page/script/useful-scripts/reference/r_DisplayFieldMessages.html

Selected Answer: B

`g_form.showFieldMsg()`

B is correct

Question #69

Which actions can a Business Rule take without scripting?

- A) Set field values and write to the system log
- B) Set field values and generate an event
- C) Set field values and add message (Correct Answer)**
- D) Set field values and query the database

Explanation

Correct Answer:

C

Reference:

https://developer.servicenow.com/dev.do#!/learn/learning-plans/orlando/new_to_servicenow/app_store_learnv2_scripting_orlando_business_rule_actions

Community Discussion

Selected Answer: C

Set field values and add message is correct

Selected Answer: C

https://developer.servicenow.com/dev.do#!/learn/learning-plans/utah/new_to_servicenow/app_store_learnv2_scripting_utah_business_rule_actions

Question #70

Which server-side object provides methods for working with dates when writing a script in a privately scoped application?

A) GlideDateTime (Correct Answer)

- B) GlideRecord
- C) GlideSystem
- D) current

Explanation

Correct Answer:

A

Reference:

https://developer.servicenow.com/dev.do#!/reference/api/paris/server_legacy/c_GlideSystemAPI#r_GS-nowNoTZ

Community Discussion

Selected Answer: A

A - GlideDateTime

Selected Answer: A

a is the correct answer

Question #71

Application developers can specify which ServiceNow page a user sees after submitting a new record using the Record Producer UI. How is the page specified?

- A) Create an application property to store the URL
- B) Configure the page in the Module that opens the Record Producer UI
- C) Write an after Business Rule script for the Record Producer's table: window.redirect = "<URL>";

D) Write a script in the Record Producer's Script field: `producer.redirect = "<URL>";` (Correct Answer)

Explanation

Correct Answer:

D

Reference:

https://docs.servicenow.com/bundle/orlando-it-service-management/page/product/service-catalog-management/concept/c_PopulatingRecordData.html

Community Discussion

Selected Answer: D

"To redirect an end user to a particular page after the record producer is submitted, define the redirect link in the Script field"

Selected Answer: D

https://docs.servicenow.com/bundle/vancouver-servicenow-platform/page/product/service-catalog-management/concept/c_PopulatingRecordData.html

Selected Answer: D

d is correct

Question #72

Identify characteristic(s) of a Record Producer. (Choose three.)

A) All records created using this strategy are inserted into the Requested Item [sc_req_item] table.

B) Each field prompts the user with a question rather than a field label. (Correct Answer)

C) They must be scripted.

D) You can script behaviors of fields in the user interface. (Correct Answer)

E) Graphics can be included on the user interface. (Correct Answer)

Explanation

Correct Answer: BDE ?

Community Discussion

B, D, E

Selected Answer: BDE

C is not correct because scripting a record producer is not mandatory.

Selected Answer: BDE

C is wrong. Just a few questions up there is the one asking which actions a Record Producer can take without scripting. Its set value and add message.

Selected Answer: BDE

Scripting is not mandatory so C is incorrect.

Selected Answer: BDE

Question #73

Which server-side API debug log method is available for scoped applications?

- A) gs.log()
- B) gs.info() (Correct Answer)**
- C) gs.debuglog()
- D) gs.print()

Explanation

Correct Answer:

B

Reference:

Community Discussion

Selected Answer: B

gs.info

Selected Answer: B

b is correct

Question #74

Which script types execute on the server? (Choose three.)

A) Business Rule (Correct Answer)

B) Client Scripts

C) UI Policies

D) Script Actions (Correct Answer)

E) Scheduled Jobs (Correct Answer)

Explanation

Correct Answer: ADE [?](#)

Community Discussion

Its A D E. Business Rules, Script Actions and Scheduled Jobs

Its A D E. Business Rules, Script Actions and Scheduled Jobs

Selected Answer: ADE

UI Policies runs client side not on the server side

Selected Answer: ADE

https://docs.servicenow.com/bundle/tokyo-application-development/page/script/server-scripting/concept/c_ServerScripting.html

B, D, E

Question #75

What is the best UX format to use for lists and forms?

- A) Forms
- B) Lists
- C) Standard
- D) Classic (Correct Answer)**

Explanation

Correct Answer: D [?](#)

Community Discussion

Answer is D, there are only two types of UX options: Mobile and Classic. Classic is defined as "manage records via lists and form"

Selected Answer: D

Correct answer is D

Selected Answer: D

Correct answer is D

Selected Answer: D

Only two types, mobile and classic.

Question #76

When creating a table in a privately-scoped application, which four Access Controls are created for the table?

- A) Insert, Delete, Query, Write
- B) Create, Delete, Read, Write (Correct Answer)**
- C) Create, Delete, Read, Update
- D) Insert, Delete, Query, Update

Explanation

Correct Answer: B [?](#)

Community Discussion

Selected Answer: B

Create, Delete, Read, Write

Selected Answer: C

The question is about table not the business rule, so the correct answer is C

Selected Answer: B

create, delete, read, write is the options in Studio

Selected Answer: B

Answer B: https://developer.servicenow.com/dev.do#!/learn/learning-plans/tokyo/new_to_servicenow/app_store_learnv2_securingsapps_tokyo_securing_table_records

Selected Answer: C

C is correct. Can read, Can create, Can Update , Can Delete are the options

Question #77

Which one of the following is true for this script fragment?

```
g_user.hasRole('x_my_app_user');
```

- A) There is no `g_user.hasRole()` method
- B) The method returns false only if the currently logged in user has the `x_my_app_user` role
- C) The method returns true only if the currently logged in user has the `x_my_app_user` role
- D) The method returns true if the currently logged in user has the `x_my_app_user` role or the admin role (Correct Answer)**

Explanation

Correct Answer:

D

Reference:

https://developer.servicenow.com/dev.do#!/learn/learning-plans/orlando/new_to_servicenow/app_store_learnv2_scripting_orlando_the_glideuser_g_user_class

Selected Answer: D

<https://www.servicenow.com/community/nw-platform-forum/g-user-hasrole-g-user-hasroleexactly-and-g-user-hasroles/m-p/1095998>

Selected Answer: D

d is correct

Question #78

Which one of the following database operations cannot be controlled with Application Access?

A) Query (Correct Answer)

- B) Update
- C) Create

D) Delete

Explanation

Correct Answer:

A

Reference:

https://developer.servicenow.com/dev.do#!/learn/learning-plans/orlando/new_to_servicenow/app_store_learnv2_securingsapps_orlando_application_access_database_settings

Community Discussion

Selected Answer: A

A query can happen but what shows up would be controlled.

Selected Answer: A

A: Query The Can read, Can create, Can update, and Can delete Application Access options grant scripts from other application scopes the ability to perform database operations against the table records. https://developer.servicenow.com/dev.do#!/learn/learning-plans/rome/servicenow_administrator/app_store_learnv2_securingsapps_rome_application_access_database_settings

Question #79

For Application Access there is a configuration option called Allow access to this table via web services. Which one of the following statements is true when this option is selected?

- A) This option restricts the ability to delete records via web services but records can always be read
- B) Even when not selected, users with the correct permissions can use web services to access the table's records
- C) This option restricts access only to SOAP web services but does not apply to REST
- D) The user performing the query via web services must have the correct permissions to access the table's records (Correct Answer)**

Explanation

Correct Answer: [D ?](#)

Community Discussion

Selected Answer: D

Correct answer is D

https://developer.servicenow.com/dev.do#!/learn/learning-plans/rome/new_to_servicenow/app_store_learnv2_securingapps_rome_application_access_web_services

Selected Answer: D

"Although the admin user who initiated the web services call, is authorized to access the Occasions table records, authorization is not granted to make web services calls to the table" Do only D is correct

Selected Answer: D

D is correct.

Question #80

Which of the following statements must evaluate to true for a user to pass an Access Control? (Choose three.)

- A) The user has one of the roles specified in the Required roles related list. (Correct Answer)**
- B) Scripts configured in the Access Control must evaluate to true. (Correct Answer)**
- C) Other matching Access Controls for the records evaluate to true.
- D) Conditions configured in the Access Control must evaluate to true. (Correct Answer)**
- E) The user must be granted access through a business rule.

Explanation

Correct Answer: [ABD ?](#)

Community Discussion

Selected Answer: ABD

ABD are the correct options

Selected Answer: ABD

ABD are the correct options

I think its ABD.

I believe that the correct answer should be A, B, C and D Source: <https://docs.servicenow.com/bundle/utah-platform-security/page/administer/contextual-security/concept/access-control-rules.html> Search for "ACL evaluation process" on the page and you can find the following line as well: "[Record ACL rules only] The matching table-level and field-level ACL rules must both evaluate to true."

A :The user has one of the roles specified in the Required roles related list. true

Question #81

What is a workflow context?

- A) The table for which a workflow is defined plus any conditions such as "Active is true"
- B) It is generated from a workflow version, executes activities, and follows transitions (Correct Answer)**
- C) The business reason or process for which a workflow is designed
- D) It is a checked out workflow which is being edited

Explanation

Correct Answer:

B

Reference:

https://support.servicenow.com/kb?id=kb_article_view&sysparm_article=KB0538528

Community Discussion

Selected Answer: B

https://developer.servicenow.com/dev.do?_escaped_fragment_=/learn/learning-plans/orlando/new_to_servicenow/app_store_learnv2_automatingapps_orlando_workflow_contexts#:~:text=A%20context%20is%20a%20workf

Selected Answer: B

https://docs.servicenow.com/de-DE/bundle/tokyo-servicenow-platform/page/administer/workflow-administration/reference/r_AdministeringWorkflowContexts.html

Question #82

Which one of the following is a benefit of creating an Application Properties page for each application you develop?

- A) Application Properties allow a developer to override the application properties inherited from ServiceNow
- B) An Application Properties page is a good landing page for an application
- C) Application Properties allow a developer or admin to make changes to an application's behavior without modifying application artifacts (Correct Answer)**
- D) Application users know to go to the Application Properties page to change the appearance of an application

Explanation

Correct Answer:

C

Community Discussion

Selected Answer: C

It is the best option

C - best practice.

Question #83

Which one of the following is NOT an example of when an application might use a Scheduled Script Execution (Scheduled Job)?

- A) The application needs to send weekly email reminders to requestors for all records on a table
- B) The application needs to run a clean up script on the last day of every month
- C) The application needs to query the database every day to look for unassigned records
- D) The application needs to run a client-side script at the same time every day (Correct Answer)**

Explanation

Correct Answer: D [?](#)

Community Discussion

Selected Answer: D

D is the correct answer

Selected Answer: D

Scheduled scripts are server side scripts, thus running a client-side script at the same time everyday cannot be accomplished with a scheduled script execution. The application needs to run a client-side script at the same time every day

D is the correct answer

Selected Answer: D

All the others are server side which is good for scheduled jobs. client side isn't ideal for schedule jobs.

Selected Answer: D

Scheduled Jobs run on the server side, you cannot run a client script daily, D is the correct answer

Question #84

Which one of the following objects CANNOT be used in a Script Action script?

A) previous (Correct Answer)

- B) GlideRecord
- C) event
- D) current

Explanation

Correct Answer:

A

Reference:

https://docs.servicenow.com/bundle/paris-platform-administration/page/administer/platform-events/reference/r_ScriptActions.html

Community Discussion

Selected Answer: A

https://docs.servicenow.com/bundle/tokyo-platform-administration/page/administer/platform-events/reference/r_ScriptActions.html

Selected Answer: A

No you can not access the "previous" object in script action. Note: Script actions are triggered by events only. <https://www.servicenow.com/community/itsm-forum/can-we-access-the-previous-object-in-script-action/m-p/875206>

Selected Answer: A

https://docs.servicenow.com/bundle/sandiego-platform-administration/page/administer/platform-events/reference/r_ScriptActions.html

Selected Answer: A

https://docs.servicenow.com/en-US/bundle/vancouver-platform-administration/page/administer/platform-events/reference/r_ScriptActions.html

Question #85

How does ServiceNow match inbound email to existing records?

A) Watermark (Correct Answer)

- B) Record link
- C) Subject line
- D) sys_id

Explanation

Correct Answer:

A

Reference:

Selected Answer: A

"By default, the system generates a watermark label at the bottom of each notification email to allow matching incoming email to existing records." https://docs.servicenow.com/bundle/tokyo-servicenow-platform/page/administer/notification/concept/c_WorkingWithWatermarks.html

Selected Answer: A

A is correct.

Question #86

When debugging Email Notifications, what must you check on a user record? (Choose three.)

A) Active must be true. (Correct Answer)

B) The First name and Last name fields must have values.

C) The value in the Notification field must be set to enabled. (Correct Answer)

D) The user must not be locked out.

E) The Email field must have a value. (Correct Answer)

Explanation

Correct Answer: ACE ?

Community Discussion

Selected Answer: ACE

https://community.servicenow.com/community?id=community_question&sys_id=8c5e9dcbdb71ff8014d6fb243996197e https://support.servicenow.com/kb?id=kb_article_view&sysparm_article=KB0535129

Selected Answer: ACE

Must have email, must have notification enabled and should be active

Selected Answer: CDE

A don't agree with "A". Active must be true? Active what? I know SN troubleshooting article lists a use case where if Incident is no longer active, the email is not sent out because Incident Opened email notification has a condition of [active] [is] [true]. But that is a single case, and hardly can be applied to troubleshooting all email notifications. C - because notifications must be enabled D - because locked users cannot receive emails by design: https://support.servicenow.com/kb?id=kb_article_view&sysparm_article=KB0859406 E - because user will not get email if their email field is empty

Selected Answer: ADE

Even if Notification field is set to false, users will still receive mandatory notifications.

I believe ADE is correct. https://support.servicenow.com/kb?id=kb_article_view&sysparm_article=KB0859406

Question #87

What are web services?

- A) Methods used to create and maintain UI Pages
- B) Methods used to allow applications to connect to other software applications over a network (Correct Answer)**
- C) Methods used to discover a wide variety of systems and applications
- D) They provide a customer-facing view of available service and product offerings provided by departments within the organization

Explanation

Correct Answer:

B

Reference:

https://docs.servicenow.com/bundle/quebec-application-development/page/integrate/web-services/reference/r_AvailableWebServices.html

Community Discussion

Selected Answer: B

B is correct.

b seems right https://developer.servicenow.com/dev.do#!/learn/learning-plans/rome/servicenow_application_developer/app_store_learnv2_rest_rome_what_are_scripted_web_services

Question #88

Which of the following methods is NOT part of the ServiceNow REST API?

A) COPY (Correct Answer)

- B) GET
- C) DELETE
- D) POST

Explanation

Correct Answer:

A

Reference:

https://developer.servicenow.com/dev.do#!/reference/api/orlando/rest/c_TableAPI

Community Discussion

Selected Answer: A

Supported HTTP request methods GET DELETE HEAD PATCH POST PUT https://docs.servicenow.com/bundle/sandiego-application-development/page/integrate/inbound-rest/concept/c_RESTAPI.html

Selected Answer: A

Copy isn't an option

Question #89

You are developing the MyApp application that has a table, Table A. When the MyApp application is installed on an instance, you want Table A's records to be installed as part of the application.

Table A's records will be installed when:

- A) Table A is active and extends the Task table
- B) Table A's records are added to the application record using the Create Application Files context menu item (Correct Answer)**
- C) Table A has an automatic number counter for new records
- D) Table A is not included in the System Clone > Exclude Tables list

Explanation

Correct Answer: B ?

Community Discussion

Selected Answer: B

B is the correct answer in this case

Selected Answer: B

https://community.servicenow.com/community?id=community_question&sys_id=1d14a144db8f7f08190dfb243996190f

Selected Answer: B

B is correct

Selected Answer: B

https://docs.servicenow.com/bundle/tokyo-application-development/page/build/applications/task/t_IncludeApplicationData.html

Selected Answer: B

B is the right answer

Question #90

How can an application link to a repository behind a firewall?

- A) This option is not supported.
- B) Link an application to source control through a MID Server. (Correct Answer)**
- C) Link an application to source control through an access token.
- D) Link an application to source control with multi-factor authentication.

Explanation

Correct Answer:

B

Reference:

https://docs.servicenow.com/bundle/quebec-application-development/page/build/applications/concept/c_SourceControlIntegration.html

Community Discussion

Selected Answer: B

"Use an existing MID Server to connect to a Source Control repository. Linking or importing an application through a MID Server enables access to repositories behind a firewall." https://docs.servicenow.com/bundle/tokyo-application-development/page/build/applications/concept/c_SourceControlIntegration.html

B is correct: MID Servers help you to control and secure how ServiceNow communicates with your organization's systems, especially those behind a firewall

Selected Answer: B

MID servers are where its at!

Question #91

What is the ServiceNow store?

- A) Downloadable content ServiceNow script archive
- B) Alternate name for the ServiceNow Developer Share site

C) The source for ServiceNow Community created developer content

D) Marketplace for free and paid certified ServiceNow applications and integrations (Correct Answer)

Explanation

Correct Answer:

D

Community Discussion

Selected Answer: D

Yup, it is D

Selected Answer: D

D is correct

Question #92

Tables that extend a table do what?

A) Automatically update the application scope

B) Do not inherit the parent's fields

C) Sometimes inherit the parent's fields

D) Inherit the parent's fields (Correct Answer)

Explanation

Correct Answer:

D

Community Discussion

Selected Answer: D

Parents pass (think like hair color or eye color) to their kids. (genetics is more complicated but it helps here too).

Question #93

When creating an application through the Guided Application Creator, which of the following is NOT an option for creating a table?

A) Create table from template (Correct Answer)

- B) Create table from scratch
- C) Extend a table
- D) Upload spreadsheet

Explanation

Correct Answer: A ?

Community Discussion

Selected Answer: A

A is correct answer. <https://docs.servicenow.com/bundle/tokyo-application-development/page/build/guided-app-creator/concept/gac-tables.html>

Selected Answer: A

There's no template option

Selected Answer: A

A is the correct answer

Selected Answer: A

A is correct answer

Selected Answer: A

A - no template

Question #94

Server-side scripts manage what?

A) Database and backend (Correct Answer)

- B) Playbook access
- C) User access
- D) Forms and Fields

Explanation

Correct Answer: A [?](#)

Community Discussion

Selected Answer: A

A is correct answer. https://docs.servicenow.com/bundle/tokyo-application-development/page/script/server-scripting/concept/c_ServerScripting.html

Selected Answer: A

Server side is back end things.

Selected Answer: A

A is correct

Question #95

What intuitive development interface guides users through the initial application development process?

A) Guided Tour Designer

B) Guided Application Creator (Correct Answer)

C) ServiceNow Studio

D) Flow Designer

Explanation

Correct Answer:

B

Community Discussion

Selected Answer: B

ADF SN, MODULE 3, PN=62 Answer: Guided Application Creator

Selected Answer: B

GAC!!!

Selected Answer: B

B is correct

Question #96

What are some benefits of developing private, scoped applications? (Choose two.)

- A) To avoid using a code repository like GitHub or GitLab
- B) To reduce risk at code collisions (Correct Answer)**
- C) To enable installation and uninstallation of an application (Correct Answer)**
- D) To replicate ServiceNow functions a private scope

Explanation

Correct Answer:

BC

Community Discussion

Selected Answer: BC

B and C

Selected Answer: BC

B and C are correct

Question #97

Which of the following statements is NOT true for the Form Designer?

A) To add a section to the form layout, drag it from the Field Types tab to the desired destination on the form. (Correct Answer)

B) To add a field to the form layout, drag the field from the Fields tab to the desired destination on the form.

C) To remove a field from the form layout, hover over the field to enable the Action buttons, and select the Delete (X) button.

D) To create a new field on a form's table, drag the appropriate data type from the Field Types tab to the form and then configure the new field.

Explanation

Correct Answer: A [?](#)

Community Discussion

Selected Answer: A

A is correct answer. https://docs.servicenow.com/bundle/tokyo-platform-administration/page/administer/form-administration/concept/c_FormDesign.html

Selected Answer: A

Correct is A

Selected Answer: A

A is correct. Its the only one not true.

Selected Answer: A

No drag and drop but a clickable button

Selected Answer: A

A is correct.

Question #98

What records are used to track cross-scope applications or scripts that request access to an application, application resource, or event?

A) Restricted caller access records (Correct Answer)

- B) Caller tracking records
- C) Access control level records
- D) Cross-scope access records

Explanation

Correct Answer: A [?](#)

Community Discussion

Selected Answer: A

"Restricted caller access [sys_restricted_caller_access] records track cross-scope applications or scripts that request access to an application, application resource, or event in the Now Platform." <=> this is the third sentence down in the following link: <https://docs.servicenow.com/bundle/tokyo-application-development/page/build/applications/concept/restricted-caller-access-privilege.html>

Selected Answer: A

A is the correct answer. <https://docs.servicenow.com/bundle/tokyo-application-development/page/build/applications/concept/restricted-caller-access-privilege.html>

Selected Answer: A

A - sys_restricted_caller_access

Selected Answer: A

Located in table sys_restricted_caller_access.

D is the correct answer: <https://www.servicenow.com/community/developer-blog/securing-an-application-using-cross-scope-access-application/ba-p/2288801>

Question #99

Which ATF Test step allows you to create a user with speeded roles and groups for the test?

- A) Create a group
- B) Impersonation
- C) Create a user (Correct Answer)**
- D) Create a role

Explanation

Correct Answer:

C

Community Discussion

Selected Answer: C

Asnwer is in the question.

Selected Answer: C

"To impersonate a user, use the Create a User test step to create a user with specified roles and groups for the test. The user record gets rolled back after the test completes."

Selected Answer: C

c is correct

Question #100

What plugin enables the Guided Application Creator?

A) com.glide.sn-guided-app-creator (Correct Answer)

B) com.glide.service_creator

C) com.glide.snc.apps_creator

D) com.snc.apps_creator_template

Explanation

Correct Answer:

A

Community Discussion

Selected Answer: A

"Guided Application Creator is enabled via the Guided Application Creator (com.glide.sn-guided-app-creator) plugin, which is active by default in the Now Platform." Located under "Activation Information" section at this URL: <https://docs.servicenow.com/en-US/bundle/tokyo-application-development/page/build/guided-app-creator/concept/guided-app-creator.html>

Selected Answer: A

ADF SN, MODULE 3, PN= 68

Selected Answer: A

a is right.

Selected Answer: A

a is correct

Question #101

Which of the following can be an external data source for a ServiceNow application?

- A) Microsoft Excel File
- B) Data provided by a public web service using SOAP or REST
- C) CSV file

D) All of the above (Correct Answer)

Explanation

Correct Answer:

D

Community Discussion

Selected Answer: D

D is correct.

Selected Answer: D

all above is correct

Question #102

Which one of the following is true for the Application Picker and Application Scope?

- A) Global is a reserved application which does not appear in the Application Picker
- B) Selecting an application from the Application Picker does not set the Application Scope
- C) Selecting an application from the Application Picker sets the Application Scope (Correct Answer)**
- D) Selecting Global in the Application Picker sets the Application Scope to Incident

Explanation

Correct Answer:

C

Community Discussion

Selected Answer: C

"Application developers must select an application as their current scope context."
https://docs.servicenow.com/bundle/tokyo-application-development/page/build/applications/task/t_SelectAnAppFromTheAppPicker.html

Selected Answer: C

C. Selecting an application from the Application Picker sets the Application Scope

Selected Answer: C

C is the correct answer.

Selected Answer: C

C is correct.

I think the answer should be A.

Question #103

Which of the following is an available feature in Studio? (Choose two.)

- A) Push to update set
- B) Merge branches
- C) Search code (Correct Answer)**
- D) Push to external source control (Correct Answer)**

Explanation

Correct Answer: CD [?](#)

Community Discussion

Selected Answer: CD

Cannot merge branch or push to an update set in studio.

Selected Answer: CD

You can Search Code using code search: <https://www.servicenow.com/community/developer-blog/using-code-search-to-make-developing-on-the-platform-easier/ba-p/2265789> You can also push to external source control by committing local changes. https://docs.servicenow.com/en-US/bundle/utah-application-development/page/build/applications/concept/c_SourceControlIntegration.html

C and D are correct https://docs.servicenow.com/bundle/utah-application-development/page/build/applications/task/t_SearchWithinApplicationFiles.html https://docs.servicenow.com/en-US/bundle/utah-application-development/page/build/applications/concept/c_SourceControlIntegration.html

Selected Answer: CD

Like the others said, C and D

Question #104

The Task table is an example of which of the following? (Choose two.)

A) Parent class (Correct Answer)

B) Legacy class

C) Child class

D) Base class (Correct Answer)

Explanation

Correct Answer: AD [?](#)

Community Discussion

My answer is A & D. There's no search result for "legacy class" and Task is (I believe) a parent class, it doesn't extend any table, so it wouldn't be a child class to anything. "A table that extends another table is called a child class, and the table it extends is the parent class" - this is about halfway down in this link below: <https://docs.servicenow.com/en-US/bundle/tokyo-platform-administration/page/administer/table-administration/concept/table-extension-and-classes.html>

Selected Answer: AD

A & D is my answer

Selected Answer: AD

my answers

Sure. And a base class is a class that doesn't extend any other table. You can check System Definition -> Tables to see that Task doesn't extend a table. Source: <https://docs.servicenow.com/en-US/bundle/tokyo-platform-administration/page/administer/table-administration/concept/table-extension-and-classes.html> (search for "base class")

Sure. And a base class is a class that doesn't extend any other table. You can check System Definition -> Tables to see that Task doesn't extend a table. Source: <https://docs.servicenow.com/en-US/bundle/tokyo-platform-administration/page/administer/table-administration/concept/table-extension-and-classes.html> (search for "base class")

Question #105

Which of the following is true about deleting fields from a table?

- A) Table records are deleted when a field is deleted
- B) User-defined non-inherited fields can be deleted (Correct Answer)**
- C) Any field on a table can be deleted
- D) Inherited fields can be deleted

Explanation

Correct Answer:

B

Community Discussion

Selected Answer: B

B is the only one true.

Selected Answer: B

B. User-defined non-inherited fields can be deleted

Question #106

Why would you build a custom app? (Choose two.)

- A) To avoid using a code repository like GitHub or GitLab
- B) To replace ServiceNow base tables
- C) To fulfill a specific use case on internal processes (Correct Answer)**
- D) To create a custom integration for a 3rd party system (Correct Answer)**

Explanation

Correct Answer:

CD

Community Discussion

Selected Answer: CD

C and D

Selected Answer: CD

C and D are correct answers.

Question #107

What are three ServiceNow table creation methods? (Choose three.)

A) Using legacy Workflows

B) Upload and turn a spreadsheet into a custom table (Correct Answer)

C) Using Flow Designer

D) Use the Now Experience Table Creator

E) Extend a table (Correct Answer)

F) Create a custom table (Correct Answer)

Explanation

Correct Answer: BEF ?

Community Discussion

Selected Answer: BEF

"If there are no spreadsheets or existing tables to use for your application, you can create and customize a new table." see this quote in link below: <https://docs.servicenow.com/bundle/tokyo-application-development/page/build/app-engine-studio/task/create-table.html> Also see: <https://docs.servicenow.com/bundle/tokyo-application-development/page/build/guided-app-creator/task/gac-create-table-from-scratch.html> Also, no search results if search on "Now Experience Table Creator".

Selected Answer: BEF

my answers

Selected Answer: BEF

Bob has a great explanation to the answer.

Question #108

When selecting a data type for a field that will be displayed on a form, which of the following statements is NOT correct?

- A) Use the String data type for a free-form text field
- B) Use the Phone Number data type to automate phone number data validation
- C) Use the Choice data type to limit options in a field

D) Use the Date data type to enter the date and time of day (Correct Answer)

Explanation

Correct Answer:

D

Community Discussion

Selected Answer: B

There's no "phone number" data type.

Selected Answer: D

The data type Phone Number exists and also validates the Format so B is not the correct answer. The Date data type only is there for the date and not the time. That would be the Date/Time data type field. https://docs.servicenow.com/bundle/tokyo-platform-administration/page/administer/reference-pages/reference/r_FieldTypes.html

Selected Answer: D

For Date AND Time it would be "Date/Time". And "Phone Number" exists for sure.

There is "phone number" data type. On form go to configure->form layout->create new field-> "data type-phone number" will be there in the available data types.

There is "phone number" data type. On form go to configure->form layout->create new field-> "data type-phone number" will be there in the available data types.

Question #109

Which one of the following is NOT part of the Form Designer?

- A) Page header
- B) Schema map (Correct Answer)**
- C) Field navigator
- D) Form layout

Explanation

Correct Answer:

B

Community Discussion

Selected Answer: B

No map

Selected Answer: B

https://developer.servicenow.com/dev.do#!/learn/courses/sandiego/app_store_learnv2_learnmore_sandiego_learn_more/app_store_learnv2_learnmore_sandiego_form_and_list_layouts/app_store_learnv2_learnmore_sandiego_what_is_form_designer

Question #110

Which class is NOT part of the Client side scoped APIs?

- A) GlideDialogWindow
- B) GlideAjax
- C) GlideRecord (Correct Answer)**
- D) GlideForm

Explanation

Correct Answer:

C

Community Discussion

Selected Answer: C

See links from others.

Selected Answer: C

"The client-side GlideRecord API is not supported in scoped applications." Source:
https://developer.servicenow.com/dev.do#!/reference/api/utah/client/c_GlideRecordClientSideAPI

Selected Answer: C

<https://www.servicenow.com/community/developer-blog/client-side-gliderecord-replacement-for-scoped-applications-sort/ba-p/2284117>

Question #111

When designing and creating a form what do you create to organize fields on a form?

- A) Buttons
- B) Tabs
- C) Sections (Correct Answer)**
- D) Related lists

Explanation

Correct Answer:

C

Community Discussion

Selected Answer: C

https://docs.servicenow.com/en-US/bundle/utah-platform-administration/page/administer/form-administration/concept/c_FormDesign.html#title_t_AddANewSection

Selected Answer: C

Sections

Question #112

Which one of the following is a good practice for adding instructions to a form?

- A) Related links to wiki pages
- B) A Context Menu UI Action
- C) Annotations (Correct Answer)**
- D) A populated read-only field

Explanation

Correct Answer: C [?](#)

Community Discussion

Selected Answer: C

"Add instructional text and other design elements to your forms by using form annotations in Form Builder." <https://docs.servicenow.com/bundle/sandiego-application-development/page/administer/form-builder/task/create-form-annotations.html>

Selected Answer: C

Annotation

Selected Answer: B

C. Annotations

Question #113

Which of the following GlideRecord methods run a query against a database table? (Choose three.)

- A) `_get()`
- B) `runQuery()`
- C) `query()` (Correct Answer)
- D) `_query()` (Correct Answer)
- E) `get()` (Correct Answer)

Explanation

Correct Answer:

CDE

Community Discussion

Selected Answer: CDE

For answer C: `query()` https://developer.servicenow.com/dev.do#!/reference/api/utah/client/c_GlideRecordClientSideAPI#r_GRCS-query_Function For answer D: `_query()` https://developer.servicenow.com/dev.do#!/reference/api/utah/server_legacy/c_GlideRecordAPI#r_GlideRecord-_query_Object_Object https://developer.servicenow.com/dev.do#!/reference/api/utah/server/no-namespace/c_GlideRecordScopedAPI#SGR-_query_O_O For answer E: Run a search using one of the sites above to find multiple results regarding `get()`

I'll go with answers given, but here are helpful links: https://docs.servicenow.com/bundle/tokyo-application-development/page/app-store/dev_portal/API_reference/GlideQuery/concept/GlideQueryGlobalAPI.html#GlideQueryAPI https://docs.servicenow.com/bundle/tokyo-application-development/page/app-store/dev_portal/API_reference/glideRecordScoped/concept/c_GlideRecordScopedAPI.html

Selected Answer: CDE

C D E are correct

Question #114

What is the GlideForm Client-side scripting object?

- A) sn.form
- B) g_form (Correct Answer)**
- C) gs.form
- D) gs_form

Explanation

Correct Answer:

B

Community Discussion

Selected Answer: B

g_form

Selected Answer: B

B is correct: g_form https://docs.servicenow.com/en-US/bundle/vancouver-api-reference/page/app-store/dev_portal/API_reference/GlideForm/concept/c_GlideFormAPI.html

Selected Answer: B

D. field3 only

Question #115

In a Business Rule, which one of the following returns the sys_id of the currently logged in user?

- A) g_form.getUserID()
- B) gs.getUserSysID()
- C) gs.getUserID() (Correct Answer)**

D) g_form.getUserSysID()

Explanation

Correct Answer: C ?

Community Discussion

Selected Answer: C

https://docs.servicenow.com/bundle/tokyo-application-development/page/app-store/dev_portal/API_reference/glideSystemScoped/concept/c_GlideSystemScopedAPI.html

Selected Answer: C

The gs.getUserID method is used to determine the sys_id of the currently logged-in user.

Selected Answer: C

<https://servicenowguru.com/scripting/user-object-cheat-sheet/>

Selected Answer: C

C is the answer. g_form is client-side and the getUserID method returns the sys_ID of the currently logged in user

Question #116

Access Control debug information identifies whether each element of an Access Control granted or denied access. The elements appear in the debug information in the order of evaluation. In which order are the elements of an Access Control evaluated?

- A) Conditions, Roles, Script
- B) Conditions, Script, Roles
- C) Roles, Conditions, Script (Correct Answer)**
- D) Script, Conditions, Roles

Explanation

Correct Answer: C [?](#)

Community Discussion

Selected Answer: C

Still roles first, condition and then script. all must be true to pass acl

Selected Answer: C

"The sequence is ROLES first, then condition, then script." - Chuck Tomasi says so at this link: <https://www.servicenow.com/community/grc-forum/order-of-execution-of-an-acl/m-p/1311962/highlight/true#M6538>

Correct answer is C

Selected Answer: C

Should be C <https://www.servicenow.com/community/grc-forum/order-of-execution-of-an-acl/m-p/1311960>

the blue definition in the official docs defines the order <https://docs.servicenow.com/en-US/bundle/tokyo-platform-administration/page/administer/contextual-security/concept/access-control-rules.html>

Question #117

Assume a table called table exists and contains 3 fields: field1, field2, field3. Examine the Access Control list for table:

table.None read Access Control for users with the admin and itil roles

table.* read Access Control for users with the admin role

table.field3 read Access Control for users with the itil role

Which field or fields can a user with the itil role read?

- A) All fields except field3
- B) field1, field2, and field3
- C) field1 and field3
- D) field3 only (Correct Answer)**

Explanation

Correct Answer:

D

Community Discussion

First - Gives Access to admin and itil for every field second - give access to only the admin for every field third - give read access to field 3 to itil

Selected Answer: D

D. field3 only

Selected Answer: D

doctorF spells it out correctly.

Question #118

Assume a table called table exists and contains 3 fields: field1, field2, field3. Examine the Access Control list for table:

table.None read Access Control for users with the admin and itil roles

table.field3 read Access Control for users with the admin role

Which field or fields can a user with the itil role read?

- A) field3 only
- B) field1 and field3
- C) All fields
- D) All fields except field3 (Correct Answer)**

Explanation

Correct Answer: D [?](#)

Community Discussion

Selected Answer: D

<https://docs.servicenow.com/bundle/tokyo-platform-security/page/administer/contextual-security/concept/access-control-rules.html>

Selected Answer: D

Answer is D.

Selected Answer: D

Answer is D

Selected Answer: D

First gives access to both Admin and it'll Second gives access to field 3 only to admin.

I think its D

Question #119

Which of the following is NOT a caller access field option?

- A) Caller Tracking
- B) Caller Restriction
- C) None

D) Caller Permission (Correct Answer)

Explanation

Correct Answer: D [?](#)

Community Discussion

Selected Answer: D

Should be D <https://docs.servicenow.com/bundle/tokyo-application-development/page/build/applications/task/set-RCA-level.html>

D is answer. milokimok nailed it.

D is wrong. See Application Developer book page 119

Selected Answer: D

Answer is D.

Selected Answer: D

It is D

Question #120

Which method is used to retrieve Application Property values in a script?

A) gs.getProperty() (Correct Answer)

- B) g_form.getAppProperty()
- C) g_form.getProperty()

D) gs.getAppProperty()

Explanation

Correct Answer: A [?](#)

Community Discussion

Selected Answer: A

Should be A https://developer.servicenow.com/dev.do#!/learn/learning-plans/tokyo/new_to_servicenow/app_store_learnv2_automatingapps_tokyo_use_application_properties

Selected Answer: A

The Correct answer is A https://docs.servicenow.com/bundle/tokyo-application-development/page/app-store/dev_portal/API_reference/glideSystemScoped/concept/c_GlideSystemScopedAPI.html#r_ScopedGlideSystemGetProperty_String_Object

Selected Answer: A

gs.getProperty() - I write it often in my script

Selected Answer: D

Source: https://developer.servicenow.com/dev.do#!/reference/api/utah/server_legacy/c_GlideSystemAPI#r_GS-getProperty_S_O

you meant A i guess

Question #121

What Module Link type is used to access an Application Properties page?

- A) Single Record
- B) HTML (from Arguments)
- C) URL (from Arguments) (Correct Answer)**
- D) Script (from Arguments)

Explanation

Correct Answer:

C

Community Discussion

Selected Answer: C

https://developer.servicenow.com/dev.do#!/learn/learning-plans/tokyo/new_to_servicenow/app_store_learnv2_automatingapps_tokyo_create_application_properties_module

Selected Answer: C

https://developer.servicenow.com/dev.do#!/learn/learning-plans/vancouver/new_to_servicenow/app_store_learnv2_automatingapps_vancouver_create_application_properties_module

Question #122

Identify the way(s) an application can respond to an Event generated by the `gs.eventQueue()` method.

- a. Script Action
- b. Scheduled Script Execution (Scheduled Job)
- c. UI Policy
- d. Email Notification

A) b and c

B) c

C) a and d (Correct Answer)

D) a and c

Explanation

Correct Answer: C ?

Community Discussion

Selected Answer: C

"There are two possible ways to respond to events: - Email Notification - Script Action" - see this quote in link below: https://developer.servicenow.com/dev.do#!/learn/learning-plans/tokyo/new_to_servicenow/app_store_learnv2_automatingapps_tokyo_responding_to_events

C is the correct answer

Selected Answer: C

bob is right, see doc

Selected Answer: C

C is correct

Question #123

When troubleshooting and debugging notifications, where do you navigate to see if an email was sent in response to an event?

- A) System Logs > Events
- B) System Logs > Emails (Correct Answer)**
- C) System Logs > Push Notifications
- D) System Logs > ICE Logs

Explanation

Correct Answer:

B

Community Discussion

Selected Answer: B

Source: https://docs.servicenow.com/bundle/vancouver-platform-security/page/administer/time/reference/r_EmailLogs.html

Selected Answer: B

B. System Logs > Emails

B. System Logs > Emails

Selected Answer: B

The correct answer is B.

Question #124

What are the benefits of storing the majority of an Application's server-side script logic in a Script Include?

- a. This makes execution faster.
- b. Only run when called from a script.
- c. The script logic can be hidden when the Application is installed from the ServiceNow Store.
- d. For some changes to application logic there is only one place to make edits.

A) a, b, and d

B) a, b, c, and d

C) b, c, and d (Correct Answer)

D) a, b, and c

Explanation

Correct Answer: C [?](#)

Community Discussion

Selected Answer: C

Answer is C. Proof is here: https://developer.servicenow.com/dev.do#!/learn/courses/tokyo/app_store_learnv2_scripting_tokyo_scripting_in_servicenow/app_store_learnv2_scripting_tokyo_server_side_scripting/app_store_learnv2_scripting_tokyo_script_includes

Selected Answer: C

execution performance is not based on script include but rather logic, query and when/where script is running

Selected Answer: C

C. b, c, and d

Selected Answer: C

Answer is C

Agreed on C

Question #125

Which of the following is NOT a Flow Designer feature?

- A) Run a flow from a Catalog item
- B) Call a flow from another flow or subflow (Correct Answer)**
- C) Add stages to a flow
- D) Test a flow using the "Run as" feature

Explanation

Correct Answer: B [?](#)

Community Discussion

Selected Answer: B

You can't call a flow from another flow but you can call a Subflow from a flow. Create a Subflow and call from the main flow. <https://www.servicenow.com/community/itsm-forum/how-to-call-a-flow-from-another-flow-in-servicenow/td-p/2349397> You can: Run a

flow from a Catalog item <https://docs.servicenow.com/bundle/rome-servicenow-platform/page/administer/flow-designer/task/create-sc-flow.html> Add stages to a flow <https://docs.servicenow.com/bundle/rome-servicenow-platform/page/administer/flow-designer/task/add-stages.html> Test a flow using the "Run as" feature <https://www.servicenow.com/community/nw-platform-forum/run-as-property-in-flow-designer/m-p/1142272> <https://docs.servicenow.com/bundle/sandiego-application-development/page/administer/flow-designer/concept/flows.html>

Selected Answer: B

B. Call a flow from another flow or subflow

Question #126

What is the purpose of the coalesce field when importing data?

- A) If a match is not found, the existing record is updated
- B) To determine if a record matches an existing record or is a new record (Correct Answer)**
- C) To identify and merge duplicate records
- D) When a match is found, a new record is inserted

Explanation

Correct Answer:

B

Community Discussion

Selected Answer: B

b is correct I checked it on my instance

b is correct I checked it on my instance

Question #127

If you create a SOAP Message what syntax indicates a variable to pass when the function is called?

- A) current.variable_name
- B) \${variable_name} (Correct Answer)**
- C) < variable_name >.do?WSDL
- D) < variable_name >

Explanation

Correct Answer:

B

Community Discussion

Selected Answer: B

B. \${variable_name}

B IS CORRECT

Question #128

Which of the following is NOT a way to install an application on a ServiceNow instance?

- A) Install an application from the Application Repository
- B) Select the Copy button on the application record (Correct Answer)**
- C) Download and install an application from the ServiceNow Share web site
- D) Download and install a third-party application from the ServiceNow Store

Explanation

Correct Answer: B ?

Community Discussion

Selected Answer: B

There is no "copy" button on the application record (at least I couldn't see one). Also, see here: https://docs.servicenow.com/bundle/sandiego-application-development/page/build/applications/reference/r_ManagingApplications.html

Selected Answer: B

Answer is B. Could not find a copy button either. The ServiceNow Share site can be found here: <https://developer.servicenow.com/connect.do#!/share>

Question #129

Using Custom UI test step in Automated Test Framework, which of the following is NOT a testable page component?

- A) Buttons
- B) UI controls
- C) UI pages
- D) Form field values (Correct Answer)**

Explanation

Correct Answer:

D

Community Discussion

D <https://docs.servicenow.com/bundle/utah-application-development/page/administer/auto-test-framework/concept/custom-ui-test-steps.html>

Selected Answer: D

<https://docs.servicenow.com/en-US/bundle/tokyo-application-development/page/administer/auto-test-framework/concept/custom-ui-test-steps.html>

Question #130

Why create Applications in ServiceNow?

- a) To replace outdated, inadequate, custom business applications and processes
- b) To extend service delivery and management to all enterprise departments
- c) To allow users full access to all ServiceNow tables, records, and fields
- d) To extend the value of ServiceNow

A) a, b, and d (Correct Answer)

- B) a, b, c, and d
- C) a, b, and c
- D) b, c, and d

Explanation

Correct Answer:

A

Community Discussion

Selected Answer: A

Question #131

Flow Designer supports variable data types to store record data and complex data. Which of the following are supported variable data types? (Choose three.)

A) Choice data type (Correct Answer)

B) Array.Reference data type

C) Integer data type (Correct Answer)

D) Freedom data type

E) Array.Boolean data type (Correct Answer)

F) Label data type

Explanation

Correct Answer: ACE ?

Community Discussion

ACE Is correct. <https://docs.servicenow.com/bundle/tokyo-application-development/page/administer/flow-designer/reference/action-inputs-outputs.html>

Selected Answer: ACE

IT'S A,C,E

Selected Answer: ACE

A,C,E is correct

A,C,E is correct!!

A,C,E is correct

Question #132

Which of the following statements is true about Guided Application Creator?

A) The global scope option is turned on by default

B) Default access controls are automatically created (Correct Answer)

C) The welcome screen appears every time a new application is created

D) A scoped application user role is automatically created

Explanation

Correct Answer:

B

Community Discussion

Selected Answer: B

A: You set the scope on the first screen, and choose scoped or global. It does not default to G. B: In the Application Development Fundamentals Lab 3.2 demo, you can see that access controls are automatically created for the defined roles. B is correct. C: "It is best practice to add at least one scoped role for the scoped application. (ADF book, ch 3.2). You have to add roles yourself, but can choose between creating new or assign existing roles. D: The welcome screen will appear the first time the GAC is used (ADF book, ch 3.2)

Selected Answer: C

C is right

Question #133

What are the ways to designate data tables when using Guided Application Creator (GAC)? (Choose three.)

- A) Upload an existing PDF
- B) Create a new table on the platform (Correct Answer)**
- C) Use a freeform database
- D) Upload an existing spreadsheet (Correct Answer)**
- E) Use an existing table on the platform (Correct Answer)**
- F) Upload an existing word processing document

Explanation

Correct Answer:

BDE

Community Discussion

Question #134

What is the Event Registry?

- A) A Workflow which is launched every time an Event is generated; used to debug Events
- B) The Event Log which lists all Events that have been generated
- C) The method used in server side scripts to generate Events and pass parameters

D) A table containing a record for every Event known to the ServiceNow system which allows ServiceNow to react when Events are generated (Correct Answer)

Explanation

Correct Answer:

D

Community Discussion

Selected Answer: D

Question #135

Identify the ways an application can respond to an Event generated by the `gs.eventQueue()` method: (Choose two.)

- A) Client Script
- B) Email Notification (Correct Answer)**
- C) Scheduled Script Execution (Scheduled Job)
- D) Script Action (Correct Answer)**
- E) UI Policy

Explanation

Correct Answer:

BD

Community Discussion

Question #136

Is it possible to change an application's scope?

A) No, it's not possible (Correct Answer)

B) Yes, it's possible

C) Yes, but only from global scope to private scope

D) Yes, but only from private scope to global scope

Explanation

Correct Answer: A ?

Community Discussion

Selected Answer: A

Per course documentation: It is not possible to change an application's scope once the record is saved to the database.

Question #137

Which of the following is true about g_scratchpad? (Choose two.)

A) Used to push information from the server to the client (Correct Answer)

B) Does not exist on the mobile platform (Correct Answer)

C) Has constructors and methods

D) Has default properties passed by client-side scripts

Explanation

Correct Answer:

AB

Community Discussion

Selected Answer: AD

Answer is AD

Selected Answer: AB

Question #138

Client-side scripts manage what?

- A) User access
- B) Database and backend
- C) Playbook access
- D) Forms and Form Fields (Correct Answer)**

Explanation

Correct Answer:

D

Community Discussion

Question #139

When debugging Email Notifications, what must you check on a user record?
(Choose two.)

- A) Active must be true. (Correct Answer)**
- B) The Email field must have a valid value. (Correct Answer)**
- C) The user must not be locked out.
- D) The First name and Last name fields must have values.
- E) Delegation must be enabled.

Explanation

Correct Answer:

AB

Community Discussion

Question #140

When crafting a scoped application that contains flow actions, what is the application called?

A) Action

B) Spoke (Correct Answer)

C) Bundle

D) Flow

Explanation

Correct Answer:

B

Community Discussion

Question #141

Which are reasons an application could be developed on the ServiceNow platform? (Choose three.)

A) It needs workflow to manage processes. (Correct Answer)

B) It requires reporting capabilities. (Correct Answer)

C) It uses forms extensively to interact with data. (Correct Answer)

D) It requires low-level programming libraries.

E) It uses multimedia features.

Explanation

Correct Answer:

Selected Answer: ABC

Correct answers

SecExams

Question #142

Once an application is ready to share, which of the following methods of publishing are supported by ServiceNow? (Choose three.)

A) Publish to an application repository (Correct Answer)

B) Publish to a local drive

C) Publish to the ServiceNow Store (Correct Answer)

D) Publish to an Update Set (Correct Answer)

E) Publish to a spreadsheet

F) Publish to a local USB device

Explanation

Correct Answer:

ACD

Community Discussion

Selected Answer: ACD

Correct

Question #143

What is required to link a ServiceNow application to a Git repository? (Choose three.)

- A) URI
- B) ACL
- C) Application name
- D) Password (Correct Answer)**
- E) User name (Correct Answer)**
- F) URL (Correct Answer)**

Explanation

Correct Answer: DEF ?

Community Discussion

Selected Answer: DEF

DEF is the correct answer

Password, Username, URL - DEF is correct

Selected Answer: DEF

Repository URL, user name and password

Question #144

What is the Endpoint when configuring a REST Message?

- A) The URI of the WebServer
- B) The command to the REST script to stop execution
- C) The URI of the data to be accessed, queried, or modified (Correct Answer)**
- D) The provider response indicates there is no data to send back

Explanation

Correct Answer:

C

Community Discussion

Question #145

Which client-side scripts apply to Record Producers? (Choose two.)

- A) Fix Scripts
- B) Catalog Client Scripts (Correct Answer)**
- C) UI Scripts
- D) Catalog UI Policies (Correct Answer)**
- E) Record Producer Policies

Explanation

Correct Answer:

BD

Question #146

Which business requirements and process(es) should be documented as part of the application development plan? (Choose four.)

- A) Available licenses
- B) Business problem (Correct Answer)**
- C) Process steps (Correct Answer)**
- D) Users/stakeholders (Correct Answer)**
- E) Database capacity
- F) Project schedule

G) Data input/output (Correct Answer)

Explanation

Correct Answer:

BCDG

Community Discussion

Question #147

Which objects are used as part of the client-side scripting API? (Choose two.)

- A) gs
- B) current ana previous
- C) g_user (Correct Answer)**
- D) workflow.scratchpad
- E) g_form (Correct Answer)**

Explanation

Correct Answer:

CE

Community Discussion

Question #148

When creating application tables, a user role is automatically added to the table record. Which other role does an application typically have?

- A) Application Super User
- B) Application Fulfiller
- C) Application Admin (Correct Answer)**

D) Application Manager

Explanation

Correct Answer:

C

Community Discussion

Question #149

Which determines the relationships between field in an Import Set table to field in an existing ServiceNow table?

- A) Data Sources
- B) Schema Map Relationship Builder
- C) Business Service Management Map

D) Transform Map (Correct Answer)

Explanation

Correct Answer:

D

Community Discussion

Question #150

What data types of Flow Designer variables are supported to store record data and complex data? (Choose three.)

- A) Label data type
- B) Integer (Correct Answer)**
- C) Array.Reference
- D) Choice (Correct Answer)**

E) String (Correct Answer)

Explanation

Correct Answer: BDE ?

Community Discussion

Selected Answer: BDE

BDE <https://docs.servicenow.com/bundle/washingtondc-build-workflows/page/administer/flow-designer/reference/action-inputs-outputs.html>

Question #151

What are the features of Flow Designer? (Choose three.)

A) Add stages to a flow. (Correct Answer)

B) Call a flow from another flow or subflow.

C) Test a flow using the “Run as” feature. (Correct Answer)

D) Support Java Scripting code to test conditions that trigger the flow.

E) Run a flow from a Catalog item. (Correct Answer)

F) Perform form field data validation at client side.

Explanation

Correct Answer: ACE ?

Community Discussion

Selected Answer: ACE

ACE, you can add stages to a flow, test the flow with the run as functionality, and associate a flow to run for a catalog item

Selected Answer: ACE

ACE is correct

Question #152

How is access to Application Menus and Modules controlled?

- A) Access Control
- B) Client Scripts
- C) Roles (Correct Answer)**
- D) Application Rules

Explanation

Correct Answer: C [?](#)

Community Discussion

Question #153

What is the ServiceNow App Repository?

- A) A Request table
- B) A database containing ServiceNow apps (Correct Answer)**
- C) A collection of files in a Git database
- D) Another name for update sets

Explanation

Correct Answer: B [?](#)

Community Discussion

Question #154

What happens to the List view when a new field is added to an existing table?

- A) The new field is added at the start of the List
- B) The new field is added at the end of the List
- C) The new field is not added to the List view (Correct Answer)**
- D) A List View is created with the new Field

Explanation

Correct Answer: C [?](#)

Community Discussion

Question #155

Exportitem table is extended from Item Table with the additional column of ItemCountry added. The Item table contains the columns ItemName and ItemQty.

Which fields are available in the ExportItem Table?

- A) Only ItemCountry
- B) ItemName, ItemQty, and ItemCountry (Correct Answer)**
- C) ItemCountry, Number
- D) Only ItemName, ItemQty

Explanation

Correct Answer: B [?](#)

Community Discussion

Question #156

What data types of Flow Variables are supported to store record data? (Choose three.)

A) Choice

B) Date (Correct Answer)

C) Array

D) Integer (Correct Answer)

E) String (Correct Answer)

Explanation

Correct Answer: BDE [?](#)

Community Discussion

Question #157

Which of the following objects does a Before Business Rule have access to in a script?

A) current

B) previous

C) GlideRecord

D) All of the above (Correct Answer)

Explanation

Correct Answer: D [?](#)

Community Discussion

Question #158

Which options are strategies for debugging client-side scripts? (Choose two.)

A) `g_form.addInfoMessage()` (Correct Answer)

B) `gs.addErrorMessage()`

C) `gs.log()`

D) `jslog()` (Correct Answer)

Explanation

Correct Answer: AD [?](#)

Community Discussion

Question #159

In a privately-scoped application, which methods are used for logging messages in server-side scripts? (Choose two.)

A) `gs.logError()`

B) `gs.log()`

C) `gs.debug()` (Correct Answer)

D) `gs.info()` (Correct Answer)

E) `gs.error()`

Explanation

Correct Answer: CD [?](#)

Community Discussion

Question #160

When creating an application through the Guided Application Creator, what are the options for creating a table? (Choose three.)

- A) Run import jobs
- B) Use API calls
- C) Create a table from a template
- D) Create a table from scratch (Correct Answer)**
- E) Link to external tables
- F) Extend a table (Correct Answer)**
- G) Upload a spreadsheet (Correct Answer)**

Explanation

Correct Answer: DFG [?](#)

Community Discussion

Selected Answer: CDG

Selected Answer: DFG

Is the correct answer DFG

Question #161

Which one of the following database operations can be controlled with Application Access? (Choose two.)

- A) Query
- B) Update (Correct Answer)**
- C) Create (Correct Answer)**
- D) Delete

Explanation

Correct Answer: BC [?](#)

Community Discussion

Question #162

Which is an example of when an application might use a Scheduled Script Execution (Scheduled Job)?

- A) The application needs to run a client-side script at the same time every day.
- B) The application needs to query the database every day to look for unassigned records. (Correct Answer)**
- C) To display a custom welcome message when a user logs in.
- D) To validate form input fields before a record is submitted.

Explanation

Correct Answer: B [?](#)

Community Discussion

Question #163

What field type would you select if you want to query records from another table on a form?

- A) Use the Date field type.
- B) Use the Phone Number field type.
- C) Use the String field type.
- D) Use the Reference field type. (Correct Answer)**

Explanation

Correct Answer: D ?

Community Discussion

Question #164

What functionality is supported by Flow Designer?

- A) The role flow_operator can create and edit flows.
- B) Flows can be "Run as" security admin.
- C) Call a subflow from a flow. (Correct Answer)**
- D) Flows can trigger off a record being deleted.

Explanation

Correct Answer: C ?

Community Discussion

Question #165

What is a characteristic of Modules?

- A) Every Module must be associated with a table.
- B) Access to Modules is not controlled with roles.
- C) Every Module must be part of an Application Menu. (Correct Answer)**
- D) Modules cannot open forms or lists.

Explanation

Correct Answer: C ?

Community Discussion

Question #166

Which method can be used to install an application on a ServiceNow instance?
(Choose three.)

- A) Install from the Google Play Store.
- B) Download from Stack Overflow.
- C) Download and install a third-party application from the ServiceNow Store. (Correct Answer)**
- D) Use the "Install" button on the application record.
- E) Install an application from the Application Repository. (Correct Answer)**
- F) Import an application from an XML file. (Correct Answer)**

Explanation

Correct Answer: CEF [?](#)

Community Discussion

Question #167

Which one of the following is the correct Link Type to select when creating a module which opens the Record Producer UI for a user rather than the ServiceNow form UI?

- A) URL (from Arguments:) (Correct Answer)**
- B) Content Page
- C) Script (from Arguments:)
- D) HTML (from Arguments:)

Explanation

Correct Answer: A [?](#)
